The Tale of Perfect Time in a Watch

 From Mainspring to Hairspring, between them lies the secret.
 The Mainspring is the power which transmits to the active parts of the watch. The Hairspring has the control and regulates the motion. The Spring is most delicate; imagine a 100th part of a hair. (Impossible for the eye to see.) Yet it is enough to interfere in its performance so wonderful is the adjustment. The friction from accumulating dirt, lack of oil, etc., destroy these perfect fittings. Do not let your watch run to ruin from neglect. Remember our business is the care of watches, and our business is to give you the best.
