Masses of Flowers Attractive Spring Vegetables.

Pinkest of rhubarb rearing its pale head proudly beside great bunches of crinkly, green lettuce; perfume of Easter lities and hyacinths on the flower wagons; maple syrup gleaming its golden-brown liquid sweetness in crystal jars or shining pail; the clear full-throated note of a robin perched overhead—all these, with the mingled throng of countrymen and women, still clad in the apparel of winter-city men and women of all conditions and classes in life—the stamping of horses and the cry of hucksters—all these, and you have before you the distinctive features of an Easter market in London the less

One cannot think of a more appropriate Easter gift for a "shut-in" than one of these fragrant lilles. But now we must turn to the more prosaic part of the Easter market. What shall we put into the basket? Some of these nice eggs that have "freshness" written all over their pale countenance; a bunch or two of lettuce will garnish our Easter salad nicely, and when the shopping person adds some pinky rhubarb one knows that a "deep" pie with delicate crust and rich creamy sauce will be forthcoming for dinner. CARE OF TAILORED SUIT.

The value of taking proper care of tailored clothes is seldom fully realized, but it is really almost as important as the proper cut.

A tailored suit should be thoroughly brushed as soon as it is taken off, especially the bottom of the skirt and the collar of the coat.

The coat should be put on a padded hanger, which in turn should be hung on a pole in the closet so that the garment will not come in close contact with anything else.

The skirt should be hung by two tapes placed at each side of the belt, or else clenched by trousers hangers. In the latter case the waistband of the skirt should be folded and the hangers closed over it.

MOTHER and BILLY STEVENS-His Story.

XLIV.-Billy's Second Chance.

[Copyright.] When the Head Worker went on Mon day to see Mrs. Z., things had taken a turn for the better. "He is as good as gold through the day," said Mrs. Z., "but he cries all night." He was as much frightened the trial anyway, I think. when he was introduced to it as a horse is when he is introduced to an automoair as Mrs. Z. intended. Perhaps that was partly the reason. Anyway, Mrs. Z. said she would try him another week Then at the end of that week she sent the same message again. She could not And our hearts sank again. But then she did it all over again and gave him a third chance. And this time she was clever enough to turn round lieved he thought more of Billy than he did of any of his own three! Mr. Z. bore this meekly. He knew she did not mean it. So Billy had his third chance

For Bath de Luxe

There is a reason deeper than the love of luxury for the perfumed bath. A sweet odor is a recognized, harmless narcotic; it lulls the tired nerves to rest and give a sense of contentment. When this odor is combined with the invigoration of a bath the results are wonderfully beneficial, After a tiresome round of shopping ocial engagements, etc., a perfumed

bath will give one the impetus and inspiration to enter the social whirl again and to enjoy it until the early morning hours. The perfume, however, must be an alluring one, a scent which appeals to

the individual. In this appeal one of the new bouquet odors has been most successful. It has just enough of the spiciness of the east to make it refreshing, and yet it is not overwhelming, and is more subtle than persistent. There is a distinctly floral suggestion which is sometimes lost in he bouquet scents.

It is such a simple thing to drop a teaspoonful of the perfumed crystals into the basin or a tablespoonful into the bath, and yet the results are se

THE FIRST MONOCLE.

The monocle, for which New York vomen are said to be developing craze, has been worn by men for hundred years. The first person to screw a glass in his eye was, according to Sir Horace Rumbold, a Dutch exquisite, Jonkheer Breele, whose monocle startled the diplomats assembled for the congress of Vienna. The fashion spread rapidly. In Dr. Kitchiner's "Economy of the Eyes," published nine years after the congress, he deplores the fact that "a single glass, set in a smart ring, is often used by trinket fanciers merely for fashion's sake. These folks have not the least defect in their sight, and are not aware of the mischievous consequences of such irritation."

CURING A DOUBLE CHIN.

For curing a double chin one simple novement is invaluable, but the rem- men. edy should be resorted to early, as in late life the skin loses its elasticity and fails to respond quickly to the touch. Rub under the chin with your fingers, beginning at one side and drawing the fingers out at the other. This done with first one hand and then the other makes many strokes a min-ute possible, and the flesh under such treatment should by and by begin to grow less flabby and the double chin to be less conspicuous. Firm, steady strokes with the fingers should be given, and to quicken the cure an astringent lotion should now and then be used
