things will run on just as before, only more smoothly, more harmoniously, that we shall all suddenly become richer and happier by reason of free access to the market of

Fond, ney criminal, delusion ! No such mighty change can be effected without strife There has been strife twice before on the same score, and as sure as there is a God Nations and a God of Battles there will be strife again whenever it is attempted to be put in practice. You are not going to change a loyal British Canadian into a citizen of United States and ask him to renounce his British citizenship without a struggle !

War, either civil or foreign, does not come about decisively as the lion springs prey, but nations and parts of nations come into open hostilities by a system of drifting.

Strife over the annexation of Canada to the United States will not come on any fixed day but will gradually develop and weshall hardly know of it till the fighting begins insort quarter least expected. The great civil war that devastated the United States a quarter of

a century 1go came from a comparatively small matter and the first gun was a surprise, but the results were terrible, appalling, disastrous to millions of lives and billions of dol So it will be here. As sure as Annexation is forced, openly or covertly, strife will

some. And those who live through that time of strife will come out of it ruined and shattered men. To live through one such war means the lifetime of those who see it. Do you, young man, who are just entering on your future, wish to pass through suc

a civil struggle, to have your home ruined, your prospects shattered ? Do you, business men, think you can come out of such a struggle retaining your bus

ness, your customers, the money you had saved?

Do you, farmers, think you can come through such a struggle without your farm lying idle, your cattle being destroyed and carried off, your barns burnt to the ground ? Do you, women of Canada, think your fathers, husbands and sons will come back t you from such a struggle?

Do you, citizens of Toronto, think you will come through such a struggle with you houses, your lands, your investments intact? Beggary will assail you and want attend you !

Go to the Southern States and study the results of civil war there if you have any doubt about the matter.

No, there will be strife and blood before there will be Annexation, and as we sai whoever comes through such a struggle comes out of it ruined men and hopeless citizens

Think for a moment of what stuff Canadians are made, recall the history of the U. E. Loyalists, of the events of the war of 1812-15, and the attempted Fenian invasion and say if you honestly think Canadians will allow themselves to be forced to beco citizens of the United States. No, there will be bloodshed, there will be strife.

And this moment is this strife beginning. It does not begin on the field o battle : the struggle first shows itself in the press, on the platform, in the legislature, in street rows, in fights, in civil war and blazing buildings. Already has the strife got into the press and on the platform.

Of the Canadian papers, the two great Annexationist organs are The Mail and Globe The Mail is openly Annexationist, The Globe dishonestly pretends not to be Annexat tionist. It is Annexationist be use it is doing the work of the Annexationists to the south of us. They are backing up The Globe. For such men and papers as The Globe was written the remarkable article that we transfer to our columns this morning from The New York Tribune. The president of The Globe Co. and the managing editor of The Globe are Annexationists. The latter is the weak vessel fashioned by David Mills, for years an open advocate of the Americanization of Canada ! In troublesome times, or when danger threatens, men do not split hairs nor make fine distinctions. Men are not judged by "saving clauses" but by the drift of their writings and the company they

Opposed to these two Annexation journals, The Globe and The Mail, has been The World. It fought them single-handed when the movement was first started and it has fought them up to the present. So far it has carried on the war with vigor and success. We have persistently followed these Annexationists and exposed them in their mitted. true light before the Canadian people. So successful have we been that they stand to-day discredited Canadian journals. They have lost their business and The World has mained it. They have become despised and rejected of Canadians for good reason.

At last this fact is coming home to them in no agreeable fashion. Once aware their disgrace, and that their treachery to this country has been discovered, they turn on the the paper that has driven them into the corner, where they stand shivering like rats in a doler. trap. They see The World doing the business that they once got and they turn on "the little paper" that they once despised and ignored, and on the same day one treats this paper to a threat for libel, and the other pours out a measure of personal abuse because this paper published, as an item of news, a statement furnished by men on the staffs to both papers, that these two Annexationist journals were about to amalgamate. Which is the beginning of the strife in the press. Like, strife will rapidly break

out on the platfemn and in the halls of legislation unless the people in their own way put effectual stopper on these Annexationist advocates. Already they feel the heavy hand on their quaking backs. The business men of Toronto see the danger that ahese mad men are trying to rush them into, and they have said "Stop, stop ! mast, "You shall not gallop at that pace at my cost and my destruction." A crisis has approached for these Annexationist payers and they know it.

There is unquestionably a feeling of unrest and dissatisfaction with ex-isting institutions and relations, and it pervades all classes of Canadian society; but there is attice ites an organized movement in favor NEW YORK, Dec. 16 .- The stear udes sailed yesterday for Port-au-Prime It is reported on good authority that she carried several hundred thousand carall classes of Canadian society; but there is nothing like an organized movement in favor either of commercial union or annexation. Until there be such a movement the American Government should refrain from officiously meddling in Canadian concerns. At the same time Senator Sherman has given to the American press the cue to be followed whonever these matters are discussed. Po-fitical union is the wages of commercial union. The Provinces cannot expect to enjoy unrecarried several hundred thousand car-tridges and 1000 Winchester and Rem-ington rifles for the Haytian Government. The report that a crew has been sent to Port-au-Prince to bring back the steamer Haytian Republic before the United States war vessels get there is credited in shipping circles, and is considered a wise move on the part of Preston, the Haytian minister.

fitical union is the wages of commercial union. The Provinces cannot expect to enjoy unre-stricted privileges of trade with the United States without severing the political ties, that connect them with Great Britain and entering the Union as sovereign States. On those terms they will be welcomed, and will be allowed a full measure of home rule. On any other terms commercial union is not so be con-aldered a practical question.
