Briskly strong, yet mellow and rich—the strength that indicates superfine quality.

**Happy Mother Praises Tanlac**

Mrs. Cooper Declares It Restored Health of Delicate Daughter— Gains 11 Pounds.

"Six months ago Tanlac brought robust health to my daughter Stella, who is seventeen, and I wish I could tell every mother what a wonderful treatment it is," declared Mrs. Lillian Cooper, 24 Sauter St., Toronto, Ont.

"Two years ago Stella began losing ground. Her cheeks faded, she was dreadfully run-down, and so thin she was just a frame. Her nerves were so excited I feared I would have to take her out of school, for while doing her lessons she could hardly keep still, and at times couldn't write at all. Her appetite was so poor she scarcely ate enough to sustain life, and her sleep was so restless she was always tired and worn out.

"I bless the day I bought the first bottle of Tanlac. My daughter has gained eleven pounds, eats heartily, sleeps soundly, and her studies are like play. The Tanlac treatment is grand, and I believe it should be in every home.

Tanlac is for sale by all good druggists. Over 35-million bottles sold.

**United Fruit Companies Dust Prices 1923**

It has always been the policy of the United Fruit Companies to supply the lowest price possible. When we first went into the dust business, dust was selling at \$1.20 per 100 lbs. in the Amago Valley. We actually lowered this price last year we sold Bordeaux dust at \$0.90, and 20-1 sulphur-lead arsenate dust at \$1.60 delivered to the farmer. Coincident with this policy we are again pleased to announce a further price reduction, a reduction which is only made possible because of the large scale upon which we are now operating.

Prices (retail to the farmer, from every local company):

Bordeaux Dust \$1.25 per 100 lbs.  
20-1 Sulphur-lead Arsenate Dust, \$2.50 per 100 lbs.  
Straight Superfine Dusting Sulphur, \$2.70 per 100 lbs.

Prices on other mixed dusts may be had on application, and are proportionately low.

The Bordeaux dust is of the same strength as last year, being composed of 12 lbs. dehydrated copper sulphate, 3 lbs. arsenic of lime, and 80 lbs. hydrated lime, or in other words a little over 2% metallic arsenic. This dust is little more than half the retail price of the same dust of the same strength sold by any other concern in America according to all the price lists now available.

The sulphur-lead arsenate dust is about two-thirds the price at which the same material may be bought in any other district.

The above dust mixtures are all standard dusts thoroughly tried and tested and well known in all American fruit growing areas, and it is consequently with much pride that we announce ourselves as pioneers in setting new low price standards on high quality materials.

We were early approached with regard to handling the new dusts known as "green dust" and "brown dust", which are dusts containing copper and arsenic in different forms from the regular Bordeaux, and in consequence we obtained from the Dominion Entomological Laboratory at Ottawa all the information and experimental figures relating to these new dusts. From an examination of this data we found:

- 1. That the "green dust" gave a very poor control of apple scab.
  - 2. That the "brown dust" gave a control of apple scab on an average a little poorer than our regular Bordeaux dust.
  - 3. That both these dusts were heavy materials and that it took nearly half as much again of these dusts, as compared with our regular Bordeaux dust, to cover the same area of orchard.
- From the above we could come to the conclusion that these dusts were not only of lower quality than we desired, but also that they would be very expensive for an orchardist to use, and consequently that the handling of these dusts would not be consistent with the United Fruit Companies policy of low cost and high quality.
- We were further warned by the Provincial Entomologist in his speech before the Fruit Growers Association against the danger of changing from proven materials to materials about which little was known. On the same occasion the officer in charge of the Dominion Entomological Laboratory stated that these new dusts were in some respects defective, were only in an experimental stage, and had not stood the test of time. These statements served to confirm us in our opinion, and in view of the low prices at which it was possible for us to supply standard dusts, the handling of these new dusts appeared to us to be a matter of business folly.
- We are informed from our Entomological advisers that it is possible that future experiments may find methods for improving and overcoming the defects of these new green and brown dusts. We are keeping ourselves informed on any development of this nature, and are ourselves participating in factory experiments with this end in view. In the event of such new methods being found we will be in a position to manufacture and supply green or brown dust at a retail price of about \$4.00 per 100 lbs.
- The above is written to explain the policy of the United Fruit Companies which is to only supply the best quality dusts at the lowest price possible, to handle no materials which have not proven their value in the hands of impartial experimenters, but at the same time to keep in touch with all new developments so that when sufficient is known about them they may be utilized for the benefit of all the farmers and not for the benefit of any private exploiters.
- 50-3ins.—

**REV. A. J. PROSSER'S FAREWELL**  
**AT CANARD, N. S.**

Mr. Prosser came to the Canard Church seven and a half years ago from church activities at Vancouver, B.C. In the West he evidently in part imbibed and in part led in Christian activities with the true Western lustle and energy. He has maintained all his energy while at Canard and great has been the results of his fairly long, but nevertheless too brief pastorate. The church has wonderfully increased its sphere of influence and one branch has been lopped off because of its strength and made a separate church. We refer to Fort Williams, which is now one of our most vigorous and best country churches. This of itself will ever be a monument to Mr. Prosser's energy, foresight and executive ability. Two other places on the outlying districts of the church have been organized into excellent church work. Cantreville, formerly an occasional preaching station has now a fine church all paid for, regular services, and in one year contributed the sum of \$1,600 to church work. In every activity of the church and denomination he has been a leader and inspired all others by his enthusiasm. His removal from Kings County will be greatly regretted, but it is a pleasure to know that his work will be continued in a prosperous town in an adjacent county. Mr. Prosser accepted a call to the Baptist Church at Bridgetown—Kentville Advertiser.

**DEATH RATE HIGH**  
**IN NOVA SCOTIA**

The Dominion Bureau of Statistics report on death from all forms of tuberculosis, covering the first six months of the years 1921 and 1922 shows that the death rate from tuberculosis in Nova Scotia, as estimated on the per 100,000 population basis, is higher than in any other Province of the Dominion.

In the first six months of 1921, the report shows that 415 deaths, due to tuberculosis in all forms, occurred in this province, making the death rate per hundred thousand population, 79. On the population basis, Prince Edward Island is next, with 62 death, and a rate of 70 for the same period. New Brunswick is in third place with 229 deaths and a rate of 59, and all the other Provinces with the exception of British Columbia, the rate for which is 48, are under the rate of 40. The total number of deaths in the Dominion during this period, is given as 2,644.

In the period from January to June, 1922, the Nova Scotia statistics as reported show improvement. In this period, the report shows 359 deaths to have occurred, and places the rate per hundred thousand, at 70. Prince Edward Island is again in second position with 59 deaths and a rate of 67, and New Brunswick occupies third place with 241 deaths and a rate of 61. All other Provinces are rated below forty. The total number of deaths in all Provinces for this period is given as 2,523, and the rate, thirty-nine.

BRIDGETOWN, N. S.

**WINDSOR CURLERS**  
**WIN AT BRIDGETOWN**

Although two Windsor rinks lost at Bridgetown by small margins on Friday evening last, the heavy lead of the third rink gave Windsor the best end of a 40 to 31 score.

Dr. Keddy lost to Skip Little, 12-20, Anselow lost to Skip Arnold, 11-9, but Skip Smith defeated Skip Magese 21-3.

Following the match the visitors were fettered a banquet at Riverside Inn, where a most enjoyable time was spent.

The home club made the visitors stay a most enjoyable one, and those who took in the trip west, speak in the highest terms of the "Bridgetown boys as hosts."

This was Bridgetown's first season of curling, and enthusiasm there is running high, and we understand that the curlers of that place intend erecting a three sheet rink to be in readiness for next season.

In mentioning the Bridgetown-Windsor match, the feature shot should not be missed. It was made by His Worship Mayor Hicks, through a trio of narrow ports and would have done credit to the best in the game.—Hants Journal.

**A COLD POST OFFICE**

**It Is Only 850 Miles From The North Pole.**

Canada can now boast of the farthest north Post Office in the world, as a result of the work of the expedition which explored the northern archipelago last Summer under the direction of J. D. Craig and on the good ship Arctic, in command of the venerable Capt. J. E. DeGler, notable exploratory and charting work were also accomplished, as recorded briefly in the following paragraph taken from the official report of the expedition just made public by Hon. Charles Stewart, Minister of the Interior:

"A day was spent exploring and charting the hitherto uncharted portion of the coast westward from Cape Tennyson, on the southeastern extremity of Ellesmere Island. A hitherto unknown Island off the Cape was named Stewart Island after the Honorable the Minister of the Interior; a large glacier was named Cary Glacier, after the Deputy Minister of the Interior, and another glacier named after Inspector Wilcox."

Two new Post Offices, in addition to some police and customs posts, were established. One of the first mentioned is on Craig Harbor, in latitude 76 degrees, 10 minutes, on Ellesmere Island and on Ponds Inlet, 72 degrees, 45 minutes, on Baffin Island. The former is only 850 miles from the North Pole.

The report submitted by J. D. Craig to the department is made public in part as follows:

"The northern archipelago, comprising all the islands west of Greenland and N. of the mainland of Canada, has been the object of this year's operations in the north, and the Department of the Interior, through its Northwest Territories branch, has taken the first steps in an extensive program calculated to efficiently maintain Canada's sovereignty in that vast region with its important mineral potentialities, available information suggesting particularly coal, petroleum, copper, graphite, gypsum, iron, mica, and possibly gold.

"In 1920 attention was drawn to Canada's position with reference to the islands by certain acts of other governments which, in spite of previous patrols and acts of administration by Canada emphasized the fact that since the Beaulieu expedition in 1910 practically no attention, officially, had been paid by Canada to her north.

"It was found impossible to send an expedition north in 1921, but this year, 1922, saw the accomplishment of the work planned in 1920. The famous old Arctic, with many northern trips to her credit, was transferred to the Department of Marine and Fisheries, and J. D. Clark, D. L. S., was appointed officer in charge of the expedition.

"A party of nine members of the Canadian Mounted Police, under the command of Inspector C. E. Wilcox, was detailed for northern duty."

**IN THY PLACE**

"Be instant, in season, out of season."—Bible.

In thy place for every duty  
In this world of strife,  
Strive to grow in saintly beauty  
Every day of life!

In thy place, thy willing shoulder  
Under every load,  
Let thy heart grow bold and bolder  
In the heavenward road.

In thy place, what'er opposes,  
Stand up like a man,  
Never ask a path of roses,  
Working, lead the van!

In thy place, not wait for others;  
They may shrink and fall;  
Thy good fight is not thy brother's,  
Don't thy coat of mail!

In thy place, be up and doing,  
Fight the right battle;  
Still the fight with calm pursuing  
Till the Master's time!

In thy place, to weave life's story  
Full of golden lines,  
Till a crown of heavenly glory  
On thy forehead shines.

Member For Pictou Gives Notice of Resolution Respecting Maritime Seats at Ottawa.

The question of the loss of two members by Nova Scotia in the redistribution of federal parliamentary seats was formally brought to the notice of the Local House, when R. H. Graham, member for Pictou, gave notice of the following resolution:

"That in the opinion of this Legislature the representation of this Province, and of the Maritime Provinces of Canada in the House of Commons, should not be reduced.

"And, that immediate action be taken to procure the co-operation of the legislatures or governments of the other Maritime Provinces and of the federal Parliament to obtain such amendment to the British North America Act, as is necessary to carry on effect this resolution."

**LOOKED LIKE GOOD BARGAIN AT PRICE FOREIGNER PAID**

Albany, N. Y.—John Polloskie, an employee of a lumber company at Green Court, Sask., is said to have paid a stranger \$408.18 as the purchase price for the New York state barge canal, built at an estimated cost of \$170,000,000.

The state land board began an investigation into the alleged sale Tuesday after D. B. LeDun, state engineer and surveyor, presented a letter from Polloskie, requesting that the barge canal be sold to shippers as he had purchased it last Summer.

In his letter Polloskie said he had purchased the canal from a man in Rochester who told him it would be a good investment as he could sell it for \$1,000,000.

**Notice of Dissolution**

**To Whom it May Concern:**

Please take notice that the firm of DARGIE & LONGMIRE has this day, by mutual consent, been dissolved and that in the future the business will be conducted by J. E. Longmire, who will assume all outstanding debts of the firm.

Also take notice that all amounts due the said firm to this date (March 1st, 1923) are payable to E. N. DARGIE.

We take this opportunity of thanking the public for their much esteemed patronage, and would respectfully solicit for our successor, J. E. Longmire, their continuance of the same.
