

Simplicity of construction is a feature that has been kept prominently in view in the design of

Westinghouse Double-Flow Steam Turbine.

Westinghouse Steam Turbines

together with the simplification of the whole power house equipment, thereby reducing the investment, the cost of labor and up-keep. Nothing that contributes to the highest degree of commercial economy is overlooked, as that is the only sort of economy that pays.

Westinghouse Turbines are made in four modified types, each having its particular field. Single-Flow Turbines, Double-Flow Turbines, Exhaust-Steam Turbines and Non-condensing Turbines.
