

" BEES AND BEEKEEPING."

Through the courtesy of the author we have received the first three monthly parts of this new publication under the above caption. That Mr. Cheshire has given the matter a most careful study, none who read what has already been written will deny. The portions of the work thus far received treat principally of the anatomy of the honey-bee and the well executed engravings representative of the different parts of the structure, highly magnified, will prove of much value in the better understanding of the subject treated. The letter press is highly creditable to the publisher. The whole volume will be completed in about nineteen parts, and if each part is as full of interest as those already received, Friend Cheshire may well feel proud of the mission he has undertaken, and the best thanks of the beekeeping public will be his just due. The price of each part is 7d., equal in our currency to 14 cents. We will shortly be able to supply those who would like to receive them.

HONEY MARKET.

CINCINNATI.

There is no material change in the market. Demand is slow for manufacturing purposes, while trade is fair in comb and extracted honey for table use. Arrivals are good. Extracted honey brings 4 to 8 cents on arrival, according to quality. Choice comb honey 14 to 16 cents in the jobbing way. Home demand for beeswax is fair, which brings 20 to 22 cents for choice yellow on arrival.
