

THE DOMINION
Hand Seed Drill and Cultivator.
 PRICE. - \$12 50.

AS A SEED DRILL,
 THIS Machine is offered to the public with the greatest confidence. It possesses special advantages for sowing Onions, Carrots, Beets, Turnips, Parsnips, &c. It is at once simple, light, easy to operate—sowing the most difficult seeds surely and evenly, marks its own rows, makes its own drill, drops and covers the seed. All slides, recds, and brushes are dispensed with, and therefore the machine is not liable to get out of order.

FULL DIRECTIONS
 For working are attached to each Machine.
 The change from seed sower to cultivator is readily made by removing the hopper and roller, and putting on the cultivator, which can be done in three minutes.

AS A CULTIVATOR
 Is very light and simple, and can be readily expanded and contracted to the required width.
 The above machine carefully packed and forwarded to any part of the country on receipt of \$12 50.
 For sale only by

JAMES FLEMING & CO.,
 Toronto.
 JOHN A. BRUCE & CO.,
 Hamilton.

THE NEW TWIN PLOUGH.

AMONGST the Agricultural Implements exhibited at the Seed Fair of the Agricultural Society of Whitby and East Whitby, noted in these columns last week, Mr. James Walker's new invention of the "Twin Plough," was perhaps the most prominently noticeable. It is arranged with two shares, two coulters, and two mould-boards on the beam, so as to turn two furrows at once, and any width that may be required. It is specially adapted for spring work where the ground has been ploughed in the fall, and also for summer fallowing; and by the use of it, farmers can do one-half more with the same number of teams. Not a farmer who examined it (and there were many) but expressed himself highly pleased with it, and all thought that it was just the plough that Canada wants, and that it is destined to supersede, to a great extent, all other ploughs now in use. A patent has been applied for.
 Mr. Walker also exhibited his Dominion Plough, with a wheel attached to the inside of the land side of the plough with a peculiar hub, in which dirt cannot enter. By the use of this wheel, which can be attached to any plough, a great saving in draught, as well as its being a substitute for the usual sole plate, is effected. This also attracted a great deal of attention, as sole plates are so liable to wear out, and in this alone a great saving will be effected.—*Whitby Chronicle.* v1-4-11.

CANVASSERS WANTED FOR THREE NEW BOOKS.

ON one of these Books, Agents have reported up to 20 orders a day. Exclusive territory given. Address P. R. RANDALL, Publisher, v1-4-11. Port Hope, Ont.
