McCOLL BROS. & Co.
 TORONTO,

Were awarded the FIRST PRIZE for their LARDINE and other

MACHINE OILS

At the great Industrial Fair, Toronto, 1880, and

Four First Prizes and Gold Medal

At the Provincial Exhibition, Hamilton, 1880.

Their Lardine Machine Oil was used, by authority of the Association, on all the machinery at both Fairs during
 the four weeks, and proved a very superior oil.

 Out and to take Separator,
 Improved Flour Packery, Husky Separator,
 American 4 shiel Iron Halls,
 Bolting Cloths, Buckets, etc.

CONSOLIDATED PURIFIER CO'Y.
 1 & 2 MYLES LOCK, TORONTO.

STEAM USERS

Attending the Exhibitions at Montreal and Toronto desirous
 of investigating how to

SAVE MONEY BY SAVING FUEL.

At the same time secure

INCREASED CAPACITY OF STEAM POWER.

Are invited to call and see boilers in operation set with the
 JARVIS system of furnace. Among others in Montreal are
 those at Rogers & King's Iron Works, 615 Craig St.; Charles
 Child's Last and Dye Works, 112 Queen St.; and Miller
 Bros. & Mitchell, Engineers and Machinists, 116 King St.;
 and in Toronto at the extensive establishment of the *Mail*
Printing Co. There are now over 1,000 boilers set, this way
 in the United States and Canada. It is the same principle as
 the FLEMING STEEL PROCESS—the waste gases utilized
 with hot air on top of the fire, which is the only way to obtain
 perfect combustion. Waste fuel used without blast also
 foreclosing, wet peat, wet hops, spent tan and dyewoods, &c.

JARVIS FURNACE CO.,
 (P.O. Box 53) 114 KING ST., MONTREAL.

BURNELL'S

FOUR-POINTED GALVANIZED
 STEEL BARB WIRE FENCING.

There are now before the public a number of Four-
 Pointed Barbs, which to the casual observer, are similar in
 appearance to the Burnell Barb which we are making, but a
 close examination of them will show the difference and their
 inferiority.

The Grand Trunk Railway Company of Canada give it a
 preference over all others, and have contracted with us for
 over one hundred tons of fencing for immediate delivery.

This barb was patented in the United States in 1877, and
 is no infringement on any other patent, and we will defend
 dealers and consumers against the threats of pretended
 monopolists. We claim superiority for our Barb Wire over
 all others for the following reasons:—

1st.—We use only the best quality of Galvanized Annealed
 Steel Wire.

2nd.—The two strands of No. 12 Wire are twisted
 together just enough to allow for the contraction and expan-
 sion of the metal, caused by heat and cold, and not so much
 as to injure the structure of the steel.

3rd.—The Barbs on our Wire are four-pointed, they
 always presenting a barb laterally or at a right angle, which
 is a great advantage over the Two-Barb Wire, as cattle are
 unable to get against the fence to break it or push it down.

4th.—The Barbs are fastened to the Wire at intervals of
 7 inches, in a manner entirely different from any other, being
 securely locked around and between both wires, so that they
 cannot slip or move toward each other, and they also prevent
 the untwisting of the cable should either wire get broken.

5th.—The machinery by which the Barbs are put on is so
 perfect that the Cable Wires are not injured or weakened by
 the process, as is the case with other Four-Pointed Barb
 Wires.

Manufactured by the CANADA WIRE COMPANY,
 Montreal.
