Winter Wheat Crop Condition Has Been Seriously Affected

Chicago Market Reflects Country News by an Early Bulge, Which Is Checked by Profit-taking-Sharp Advance at Winnipeg.

CHICAGO, June 5.—A huge wave of speculative buying to-day in the wheat pit ran against heavy realizing sales on the part of the longs. In consequence, much of a sharp advance was lost, and the market closed easy at prices varying from Saturday night's level to %c above. Corn finished %c down to %c to %c up; oats with a gain of %c to %c, and provisions more costly by 5 to 20c.

The volume of trade I wheat exceeded that of any other day for weeks past, and also contained a larger percentage of business from the outside public. This awakening of interest was apparently due to somewhat widening impression that the crop had lost ground during the last month, and that such a condition would be clearly shown in the government report on Thursday. However, the handsome profits in sight were tempting to owners, and there was remarkably free unloading on the bulges. Hot weather over the greater portion of the winter wheat section had much to do with bringing out bullish enthusiasm. Besides, the cash demand here continued good, and there were reports of a better inquiry for flour at Minneapolis. Between the opening and the close July fluctuated between 3%c and 94c, and in the and was easy at the first-named figure, precisely the same as forty-eight hours, before.

Prospects of more normal weather led

precisely the same as forty-eight hours before.

Prospects of more normal weather led to increased corn sales by the country. Provisions in this were likewise conspicuous on the selling side at an advance, which had resulted from strength in other cereals and from the high temperature in the southwest. The range for July was from 54%c to 55%c, with the close easy, 4c off, at the low point of the day. Cash grain was barely steady.

A big rush to buy oats had its origin in the Missouri State report, showing a serious fall in the condition of the growing crop there. The ensuing advance, tho, was taken advantage of to secure profits, and there was a decided reaction. July varied at from 37%c to 38c, and closed ½c net higher, at 37%c.

Provisions were helped by the liberal exports, and thru the advance of grain and hogs. When the pit was cleared, pork was 10c to 20c higher than Saturday night, with lard and ribs-up, too, but only by half as much.

Receipts at Primary Centres.
Receipts of wheat in car lots at primary
coints, with comparisons, were as follows:

Bryan:
Wheat—There is an unusual situation in the wheat trade. The bull influences which were under May wheat for weeks before the end of May, are credited with activity on the bull side of the new crop months, possibly with a view of establishing a market in which hedging sales against large quantities of cash wheat can be made to advantage. It was the opinion of well-advised brokers in the market to-day that sales of July wheat by this bull interest were on a large by this bull interest were on a large scale, and that this selling more than all else accounted for the complete reaction in the July price from the morning advance. There was conservative profittaking on the other months after the adin the July price from the morning advance. There was conservative profitaking on the other months after the advance from the morning. There was noted in the early buying some increased volume of outside business, some eleventh-hour covering by shorts, and more opless natural bull enthusiasm, because of the continued hot, dry weather, over much of the winter wheat belt. Some of the best judges of crop conditions are figuring on a safe winter wheat harvest of about 450,000,000 bushels. The conditions all over the northwest at this time are excellent, and the spring crop promises enormous, if there is no accident.

Erickson Perkins & Co. had the fol-

Higher at \$6.70 Per Cwt.

Wheat—Opening prices showed marked advance, and the strength continued during the first hour of the session, with the deferred deliveries the stronger. There was noticeable selling of the July future, which was credited to the recent leading longs in the May delivery, the buying of the more distant months being based on extreme weather conditions which prevalled in the southwest over Sunday. Prices reacted about ic from the high point during mid-session, rallying again towards the close. We rather incline to the opinion that the advance is being overdone. At the same time, we realize that the winter wheat crop has suffered a considerable decline in condition, with crop prospects so favorable in both the American and Canadian northwest, and with the probability of the passage of the reciprocity bill, now pending in congress, we feel that the latter conditions should be taken into consideration, as both would prove important factors.

Corn—The market showed no such inherent strength as was apparent in other grains, the advance being largely sympathetic. We feel that present prices are high enough, considering the general conditions surrounding the growing crop.

Oats—The market opened strong, with a rush of buying orders, based on reports of continued deterioration in the growing crop. Prices have now advanced to a point where we rather hesitate about following an enhancement, which has been so marked, and which represents fully 20 per cent, of the value of the commodity. Conceding a possible shortage of 200,000,000 bushels, as compared with last year's yield, it must, be borne in mind that there is a large carry-over from last year's crop, which will be a partial offset to any deficiency occurring this year.

Montreal Dairy Market.

Montreal Dairy Market.

Montreal, June 5.—Exports of cheese last week were 51,320 boxes, against 24,858 a year ago. The market is fairly active and steady. Butter is quiet, the exports last week being only 308 packages. Demand for eggs is good.

Eggs—Fresh, 17½c to 18½c.

Cheese—Westerns, 10%o to 11c.

Butter—Choicest, 21c to 21½c; seconds, 18c to 19c.

licited.

Liverpool Cattle Market.

LIVERPOOL, June 5.—John Rogers & Co., Liverpool, cable to-day that there was very little change in the general conditions at Birkenhead. Saturday's prices for both cattle and sheep were well maintained. States and Canadian steers from 12c to 12%c, wethers, 11%c, and lambs 13%c per pound.

Montreal Live Stock.

Montreal Live Stock.

Montreal Live stock of the Montreal Stock Yards west end market, the receipts of live stock for the week ending June 3, were 1600 cattle, 300 sheep and lambs, 2275 hogs and 975 calves, and the supply on the market this morning for sale consisted of 750 cattle, 100 sheep and lambs, 1600 hogs and 250 calves.

Altho cable advices on cattle were weak and lower to-day, there was no important change in the condition of the local market, prices being steady. The attendance of buyers was larger than usual, a fairly active trade being done. The average quality of the stock offered was good, and this, coupled with the cooler weather, tended to increase the demand from some dealers, which resulted in a good clearance being made before the noon-hour.

A few extra choice picked steers sold as high as 6%c, but the bulk of the trading was done in choice stock at 6%c; good at 5%c to 6c; fairly good at 5%c to 5%c; fair at 4%c to 5c, and common at 4c to 4%c per pound. Some choice cows brought 5%c, and the lower grades from that down to 3%c, while the top figure paid for bulls was 5%c per pound.

The tone of the market for hogs was stronger, notwithstanding the fact that supplies were larger than a week ago. There was no actual advance in prices, but there was a keener demand from packers, and an active trade was quiet, and the trade in small meats was quiet, and Montreal Live Stock.
