The report that a new find had been made on Cobalt a new find had been made on Cobalt Lake was due to the fact that the vein at the south end of the lake is widen ing. It is heading for the McKinley-It is heading for the McKinley-Darragh line.

their financial resources would permit, without discounting their opportunities gas range and receiving \$2 change for by a largely capitalized company, they it. organized on the most conservative basis and sent prospectors out under the direction of A. R. Duff, a student ple of mineralogy, who had traveled hun-dreds of miles thru the unpeopled regions of the north studying the rock formations.

It may be said with authority that Mr. Duff is carrying on his operations in accordance with certain information that should redound to the benefit of those who are sharing in the financial

backing of this enterprise. This company offers a fair proposition and the men behind it ensure a square deal for everybody. Meanwhile a chance is offered that serious interest in the development of the northern mining fields.
