

## REPORT OF THE PHYSICAL SECTION.

*Read at the Annual Meeting of the Association.*

The Physical Section was organized in November, 1891, and has since met regularly on the second Saturday of each month.

The only papers read so far have been :

December 12th.—“The Phonograph,” by J. T. Crawford, B. A.

After the reading of the paper, several tests were made.

January 9th.—“A Brief History of Electrical Discoveries,” by J. G. Witton, B. A.

At the other meetings informal discussions have been held. Some difficulty has been experienced in obtaining papers, but that is likely to be overcome as we get together the apparatus we hope to have. We have also to regret the loss of our Secretary, Mr. J. G. Witton, who is now living in Vancouver, B. C.; his absence has somewhat interfered with the work of the Section, but we hope to see it continued next Fall.

GEO. BLACK,

*Chairman.*
