ship, and grew to the size and weight it had when observed—a diameter of nine inches and a weight of two and one-half pounds—in nine weeks.

A new use for photography in connection with the higher arts has been found in the discovery that it may be relied upon to detect any restoration or tampering with old paintings. On recently examining the first proof of a well-known Madonna, in the British National Gallery, the photographer observed a disfiguring blur over the forehead. No such blur was discernible in the original, except upon close inspection with the aid of a magnifying spection with the aid of a magnifying and the first proper to state, knowing the character of some of the people with whom Your Lordship is occassionally brought in contact, that I have reason to think when the matter comes before a Court of Justice (as is not improbable if pursued after the present fashion) it will be shown among other things that Mr. Whitcher was offered to be the contact of the people with whom Your Lordship's occassionally brought in contact, that I have reason to think when the matter comes before a Court of Justice (as is not improbable if pursued after the present fashion) it will be shown among other things that Mr. Whitcher was offered to be provided the letter addressed to your Secretary, for Your Lordship's information in reply to his letter of the fact that Captain Kidd's letter admitted of two in terpretations in relation to the Americans. I rejected the second interpretation, alleging that the author of "Guido and Lita" is agentleman and man of honour, but I think it proper to state, knowing the character of some of the people with whom Your Lordship is occassionally brought in contact, that I have reason to think when the matter comes before a Court of Justice (as is not improbable if pursued after the present fashion) it will be shown among other things that the author of "Guido and Lita". SAM'L THOMSON, JAS. BROWN,

thus passes up the stream, to a distance TOILET SOAPS

> armies in 1870 71 M. d'Almeida took a establish telegraphic communication between Paris and the provinces, using the River Seine as a conductor. This sugges-tion originated with M. Bourbouze (of war, created a chevalier for his suggestion. It was proposed to send powerful currents into the River Seine from batteries at the galvanometers, from the river such a portion of these currents as might not have leaked into the earth. After some preliminary experiments, it was decided to make the attempt, and accordingly on Dec. 17, 1870, M. d'Almeida was despatched by balloon to the provinces in order to try to establish this novel mode of telegraphy without wires. The balloon descended in the same of the submitth that a public withdrawal yet remains to be made, the amende honourable in the same of the same of the same of the submitth that a public withdrawal yet remains to be made, the amende honourable in the same of tion of these currents as might not have without wires. The balloon descended after sundry perils in the Arcadian soli-

other sieges of history.

Prof. Hind's Charges.

THE CORRESPONDENCE EROUGHT DOWN IN OTTAWA, March 7. -- The correspondent perfect that a given space will contain not Hind was brought down in the Commons more than the hundred-millionth of its this afternoon. Although voluminous, it contains little not already communicated

carbons at each revolution. The cam is reply to this letter says:carbons at each revolution. The cam is turned by clockwork, for regular signals, or by hand, at a variable rate, for the irregular ones.

Just before his death, the late Prof. Watson, of Wisconsin University was engaged in the experiment of gazing at the cause of this apparent anomaly, and to explain how it can be immediately remedied. But I ask very respectfully to

several duties.

A BYE-LAW

Relating to Booms and Boomage.

Be it ordained by the Municipal Council, of the County of Northumberland:

1, That the Boom Master of Barnaby River Boom shall, on or before the 31st day of December in each and every year, render to a Committee of three persons appointed by the shareholders of said Boom, a detailed statement of all lumber that shall pass through the said Boom during the season, together with the amount of boomage collected thereon.

2. That the Boom Master shall be entitled to receive out of the amount collected, the sum of \$1.00 per day for each day's actual attendance at said Boom, and the light ou the ouestion of the said Boom, and the light of the provider and the denizers of the spirities.

A BYE-LAW

Relating to Booms and Boomage.

A BYE-LAW

Relating to Booms and Boomage.

A BYE-LAW

Relating to Booms and Boomage.

Be it ordained by the Municipal Council, of the County of the Northwest Pacific Ocean. This represents he hothewest Pacific Ocean. This represents he water layer nearly equal to the height of the loftiest known mountain.

An Australian correspondent furnishes. And all ways held that neither Lord Salisbury, Lord Granville, His Excellency's advisers, past or present, have ever heard of, much less seen, the drawlater for the following reasons:—I have always entitle have solony sought to exhibit and explain therein. This document embodies my proofs, without a shadow of a chance of escape from the fatal conclusions towards which they point, and I have always entertained the conviction that Her Majesty's chief officers have been unconsciously led by componised and cowardly men to stand on most dangerous and untensible ground in relation to the villainy this docdiment divisions to the Northwest Pacific Ocean. This represents the solety with a view to carry out His Excellency's evident wissolety with a view to carry out His Exce

the Chusan Islands, just south of the bay of tidal currents run through the funnel-shaped frith with a velocity of sixteen miles an hour. In the eagre of the Amazon, the whole tide passes up the Chusan Islands, just south of the bay of tidal currents run through the spiracy and dreadful deeds, but nothing specific. On December 28th, he writes to the Marquis of Lorne thus:

Until the words used by Sir John A.

has received a copy of Hansard, which ber, 1880. He says :--

arrival of apparatus from England. The published in the Halifax Chronicle.
