

UNLIMITED POWER ON TAP

The day has gone by when a single farmer in Western Canada needs to be reminded of the economic difference between horse power farming and doing the whole job from New Year's Day to Christmas with a

Modern Farm Horse

The Hart-Parr Gas Tractor

Eats only when working.
Never sick. Fit for twenty-four hours a day of steady hard work—six days a week all the year round.

No good setting your pace by old timers. Horse flesh was never *intended* to do the intensive and arduous work of the Western Prairies. Anyhow you simply cannot do it and make money. Give the horses the humane treatment they ought to receive, and do your

FALL PLOWING

with the "Modern Farm Horse" of the Hart-Parr Co.,—that never gives in or complains. You can do ALL the work to the GREATEST NECESSARY DEPTH WITH A 45 or 30 H. P.

STEAM-PLOW MAN IS BEATEN—AND QUILTS

F. C. Woods, Manager of the John C. Burchard Co., Stephen, Minn., writes, Nov. 1910: "We broke 540 acres of very tough raw prairie in fine shape that a steam plowman had given up at \$3.00 per acre, because he could not make expenses. "Through this summer and fall we plowed about 2,000 acres of this heavy clay soil deeper and better than it had ever been plowed before: and believe that the additional crop next year, on account of the better, deeper plowing will pay for the engine. "We consider that this, and other Hart-Parr engines in the community, have raised the value of lands here at least \$5.00 to \$10.00 per acre.

If You are in the Money Making Game

Your greatest card will be the Hart-Parr. It particularly means what our head line indicates. Without fuss—without worry—without effort—you will make far better money than you have ever made in your life, or than you can ever hope to do by horse or steam power. The Hart-Parr is the simplest machine in the world to handle. Needs no whip or "cuss words." Fit and ready and effective in all weathers, and is BEST VALUE GOING.

Agents for Alberta. CALGARY

One Hart-Parr MEANS 30 or 45 Horse Power

This great engine is constructed almost entirely of steel—with all steel gears. The high speed gears have machine cut teeth. It is provided with two speeds; one for plowing and one for hauling and road work.
