

WE HEREBY OFFER

To the thousands of readers of this paper articles manufactured in ASSYRIAN GOLD, which is gradually, but surely, superseding every kind of imitation Gold Jewellery—for it is perfect as to colour (18-carat, gold-like), delicate and unique as to workmanship, and for general appearance cannot be told from the precious metal. The Editors of "The Weekly Times," "Christ an Signal," "The Fountain," "Sunday Times," etc., etc., speak in terms of unqualified praise of the Greatest Scientific Discovery of the Nineteenth Century—ASSYRIAN GOLD: also of the honest, straightforward way in which we conduct our business.
