

C274566

Do please, be so kind as to pardon me this autograph, as my poor English (no matter in this baby book, when I am writing) would as a refuge from Paris, as, too, this handwriting - no typewriter - to be available here!

The III world war has already begun in a state, "large" and the greatest danger for real Democracy after it consists not in external, but in the internal battles with mob-tyranny, scientifically prepared and propagated to the Soviets, supported by naive people and workmen organizations, to be the most advanced flank of Democracy, being in fact the most awful reaction of rationalistic Paganism against the essence of Christian teaching of Love and Freedom by consent - Liberty, of therefore the most urgent and real necessity of a tragic situation is to purify one's own front, which metaphysically thinking, I see since 20 years as a "Pro Deo" alliance of all who understand that the fight is not only going on on this planet, although for the next stage of the Man "as a God's or Satan's Son; of the bargain cede and win" which since months I developed in my diary and letters to most influential Statesmen, is to be understood in the way to win the Russian People, a very mediocre and weak capable one, indeed, therefore, necessary, being God's or Satan's, but not half by half, as most others are, to the Atlantic Liberal Democracy for which we, human liberals, fought in our country for more than a century but lost the last battle because of too much Tolstoy fashion non-resistance idealization of the present" (I). Roman's sake theory, too, of the good-ground nature of Man) the Emperor, by chance or God's will, having been a gentleman of the Tourgenyeff type, too delicate and spiritual to win a fight against the rude Ostrovsky-type, yet as probably Russian as the Romantic ones, too, 6/74 order to win the human People, two ways are simultaneously urgent, a) to unmask the Moscow dealers, as tyrants and deceivers of true Democracy putting them out of O.N.U. because not covered in the democratic spirit (the citizen matter, not the slave of the State) treaties by free consent, not by force and arms being the basis of government and growth, social and international) and to spread millions of \$ and \$ at once for propaganda by agents and figures, showing the Siberian and Russian people not down as it is comparatively to the Western Ideals and Practice, telling openly and clearly, that the fight between the two ideologies has begun and that the hour will serve the United Nations against every aggressor taking territory without its permission; but also b) even before that, cede to the Russian People as such, and telling it in spirit of the despotic brain which it suffers, all what historically Russia is entitled to claim - but this is otherwise than by treaties with Turkey, Persia, Norway, China, Korea. No obstacles and ratiocines from the Atlantic against such acquisitions by treaties, but no conventions with tyrants, of Moscow or Madrid put on the same level, until citizen liberties will be guaranteed by local public opinion, so widely, no faith - if it is awful, but better to board at once than wait until Western Christian East Britain will be killed after her towns bombed unmercifully. Please do trust me: it's very hard for me to write this - but I feel it to be my duty! Once a rather rich, very influential because absolutely independent man, not a bit ambitious, has therefore happy, now old and totally ruined alone with God and my thoughts, I pledge my word of honor, not to write in revenge, but in love and admiration of my Russian people, hoping to help to save its soul, even on behalf of its body.

I am very respectfully and sincerely
