

## CONTENTS.

Experimental Work at the Agricultural College.....	1
Results of Experiments.....	1
Conditions of the weather during the past Summer.....	2
Fluctuations in the Areas of Farm Crops in Ontario.....	3
Yields per acre of different classes of grain.....	4
Barley .....	6
Oats.....	11
Wheat.....	16
Rye.....	22
Buckwheat.....	22
Field Peas.....	23
Field Beans.....	25
Soy, Soja or Japanese Beans.....	26
Horse Beans.....	26
Grass Peas.....	26
Cow Peas.....	27
Hairy Vetches for Seed.....	27
Alfalfa for Seed Production.....	27
Corn for Grain.....	27
Sorghum for Seed.....	28
Millet for Seed.....	28
Sunflower Seed.....	28
Flax Seed.....	28
Sowing Spring Grains on Six Different Dates.....	29
Growing Grains in Mixtures for the Production of Grain and Straw.....	31
Mangels.....	33
Sugar Beets.....	35
Field Carrots.....	39
Swede Turnips.....	40
Fall Turnips.....	41
Parsnips.....	43
Kohl Rabi.....	43
Potatoes.....	44
Corn for Fodder and for the Silo.....	50
Sorghum for Fodder.....	52
Sunflowers for Fodder.....	52
Millet for Green Fodder and for Hay.....	52
Rape, Kale, Cabbage, etc.....	53
Green Fodder Crops.....	54
Winter Sowing of Winter Rye, Hairy Vetches and Crimson Clover for Fodder Production.....	55
The Wild Vetch as a Fodder Crop.....	55
Annual Crops for Pasture Purposes.....	55
Grasses and Clovers.....	57
