

The door "like a window" that shows how the baking is going on

It's Better to Watch Your Baking Without Cooling it!

A skilful cook knows how important it is to **keep the oven door shut**. The range which allows **Madam to see** the progress of the baking **without chilling the oven** has the right to her preference. The Happy Thought Range has an oven door "like a window"—transparent—showing the contents of the oven and allowing continual inspection of the baking going on inside. This window door is one of the exclusive features of the Happy Thought Range. The women in 130,000 homes are considered good cooks, just because they use this door. Its results are splendid. If you want the best stove in the world, ask your dealer to show you the special features in the

HAPPY THOUGHT RANGE

New home-builders will find it **cheapest** to buy a Happy Thought first because it is the best.

EVERY HAPPY THOUGHT BURNS COAL OR WOOD.

Cooks and Bakes perfectly at the same time

There is not another range built in which the heat may be regulated so that you can bake in the oven and cook on the top at the same time without spoiling one or the other.

But you can do both equally well at the same time on the Pandora, because its heat is not wasted and is at all times under the simplest, most positive control.

If you do the cooking of your household you can appreciate exactly what this means.

McClary's Pandora Range

St. John, N.B., Hamilton

ONE LEVER DOES IT ALL ON THE I.H.C.

You would rather operate one lever than to get mixed up with three or four. The I. H. C. Spreader has but one lever—the only spreader of that kind.

This is just one point of superiority over other spreaders. There are others.

No other spreader has a vibrating rake to level the load and bring the manure up square works better and gives a more even distribution when the load is level.

Great power is required when a spreader is in operation to run its cylinder, move its apron, level the load, etc. The I. H. C. Spreader gets ample power from both the rear wheels of the wagon.

It not only gets more power but it is surer of its power at any moment. It makes no skips, and it avoids friction, side strains, and consequent breakage.

This same thing helps to secure the light draft for which I. H. C. Spreaders are noted.

Call on the International local agent or write nearest branch house for catalog.

CANADIAN BRANCHES: Calgary, London, Montreal, Ottawa, Regina, St. John, Toronto, Winnipeg.

Send three two cent stamps for a copy of "Farm Science." Book just from the press, written by eight leading agricultural authorities of the United States. Treats practically every farm topic in the most forceful, money-making way.

International Harvester Company of America, Chicago, U. S. A. (INCORPORATED)

Its steel wheels have a superb strength. Broad tires, they do not rut the land or cut in to make heavy pulling. The turned-in flange keeps out the dirt and mud.

Rear wheels are provided with traction lugs. There's no slipping or sliding on wet or frozen ground.

It has a wide range of feed. You spread as thick or as thin as you like.

You see everything has been thought of and worked out to make the I. H. C. the leader of all spreaders.

You have choice of two types—Clover-leaf, endless apron spreader and the Corn King, with return apron. Each type is made in three sizes.

If you buy an I. H. C. manure spreader you know it is right.

LONDON Cement Tile Machine.

Farmers make their own tile. Send for descriptive catalogue of Cement Brick Machinery, Block Machines, etc.
