

GRAIN, LIVE STOCK AND PRODUCE MARKET

WINNIPEG MARKET LETTER

(Grain Growers' Grain Company's Office, July 4, 1911)

Wheat. Our market has been somewhat affected the past week by the approach on July 1, of the Canadian holiday, and on July 3 and 4, of two American holidays. The market has moved up a little, due to strength in Great Britain on the feeling that the Russian crop is not likely to be as great as in previous years, and also the feeling that the extreme heat across the American wheat belt is bound to cause considerable damage. The deliveries of wheat on the July option on July 3 were not heavy, comparatively, showing no very well defined July long or short interest. We think that as long as our own crop is coming along so nicely, wheat should be sold on any bulge in the market, especially since receipts of old crop continue so very heavy. Some export, especially No. 3 Northern and No. 4 wheat, has been worked the last few days on the resumption of business after the coronation in Great Britain. Oats. Oats have held quite steady with a good export demand until the closing day of June, when naturally the country holders of July oats were anxious to sell them, and avoid taking delivery of the cash oats on July 3. The result was a decided bear raid which sent oats down $\frac{3}{4}$ of a cent, only to see them recover sharply next morning when the country liquidation was over. Now a very good export demand continues, and our oats should hold their own, in fact do a little better in the next week or two at least.

Barley. There is no change in the barley situation more than an occasional enquiry, and we think that when the demand really comes farmers will do well to clean up their old stocks of barley.

Flax. Flax has weakened greatly, as we some time ago predicted it likely would, and the July flax is down now nearly to October price.
