FARM AND TURF.

We have already stated that method

tells upon quality and that quality

makes the price; and that the creamery

system supplies butter of uniformly

good quality. Now as to quantity. At

the Dairy Department of the Agricul-

tural college last year, experiment was

made upon 3,081 lbs. of milk; one third

was creamed by shallow pan, one third

by deep pan and one third by separator.

127.58 pounds of butter were made in

all. The total loss of fat in skim milk

and buttermilk was as follows in each

case: by separator .47 pounds; by deep

pan 1.67 pounds; by shallow pan 3.29

pounds. Thus 2.82 pounds more were

lost by shallow pan than by separator.

These 2.82 pounds of fat would make

over 3 pounds of butter. The average

per cow would be lost by the shallow

pan method, which would be retained

by the best creamery method.

For a herd of ten cows this would make

a difference of \$25. The ordinary farm

method would increase the differ-

ence. The conclusion is that by send-

ing the milk to a creamery at least 12

pounds per cow more will be obtained

than if the milk is creamed at home in

shallow pans.

The Price of Milk.

The hard times are causing city dwell-

ers to buy less milk, while the recent

raids have stimulated such luxuriant

pasture that the cows fill the milk pails

to overflowing. In consequence, the

wholesale price of milk in the Greater

New York City has fallen to one and

three-fourths cents per quart. This is

the price fixed by the New York City

Exchange, which is controlled by about

a half dozen dealers, and forms the

standard to which all other prices con-

form. It has never before gone below

two cents. The prices generally range

from 2 1/2 cents in January to two cents in

June.

What Constitutes a Drink.

One day as I drove along a pleasant

Kentucky road, I came to a farm-house

and noticing an old time well-sweep in

the yard, it occurred to me that it would

be nice to get a drink there, so I stop-

ped and spoke to a man at the gate.

"I get a drink here?" I asked

with a laughing look at the well. "Yes,"

"Sorry, mister," responded the Ken-

tuckian, "but there ain't a drop in the

place; and I was getting purty dry my-

self."

"Isn't there any water in the well?" I

repeated.

"Oh, yes, of course," he blurted out

as he hustled off for the gourd; "I didn't

Had His Way.

I see you have had a visit from George Francis Train, said a grizzled old man recently. I never hear his name that I don't think of an incident in his remarkable career many years ago, when he was in his prime and enjoying almost unlimited power says the Washington Star.

When the Union Pacific road was being built and had nearly reached completion Train took a large excursion party of eastern people out west to examine the enterprise. At Omaha, which was then the most primitive kind of a town, Train gave the party a dinner in the hotel in the place.

When the guests were seated the farric host discovered that one of the plates in the window behind his chair was broken and he ordered a waiter to stand in front of it and keep the draught from him.

The servant refused, whereupon Train called the head waiter, who also declined to be used as a pneumonia screen.

The philosopher grew angry, and sent for the proprietor.

"What will you take for this infernal old rookery?" he demanded. The bonfire named \$10,000. Train scratched off a check for the amount, threw it, as the astonished proprietor, secured a receipt and then called up the head waiter.

Stand in front of that hole in that window or get out of my service," he dictated. The head waiter took up his place as a breeze buffer without any further objection.

Peter the Great.

History Shows That the Old Ruler of Russia Was a Monster.

Years ago when a low standard of morals prevailed, the epithet Great was bestowed upon any monarch who won battles and enlarged the territory and resources of his kingdom. It mattered little then to the historian what might be a king's private character, provided he made his nation formidable by his brute strength and tall treasury. Even if he was a bad man they glorified him as a good ruler.

Peter I. of Russia is called "Peter the Great," because he transformed a barbarous into a semi-barbarous nation. But no one can now read the following summary of his character without a feeling of disgust. Voltaire in his "Philosophical Dictionary" says that "Peter was half hero and tiger." Macaulay declares that "to the end of his life he lived in his palace like a hog in a sty, and when he was entertained by other sovereigns, never failed to leave unequivocal proof that a savage had been there."

Peter, when the fit was on him, literally scared everybody—from his cook to his counsellor, from the meanest peasant to the highest noble—sparing neither age nor sex. He would get up from the table and flog the host who was entertaining him. He would stand at the door of the senate house and flog each senator that went in. Lefort was an intimate and trusted friend, yet on slight provocation he was knocked down and brutally killed by his imperial master. But all this flogging was in the way of recreation. When Peter "meant business" it was a more serious matter. Incredible as it may seem, it is nevertheless well authenticated that one of his own sisters is said more than once to have received a hundred strokes of the whip on her back in the presence of the whole court.

In 1713, Alexis, his only son, who out-lived infancy, was for some offense of no great seriousness, several times tortured, in the presence of the diabolical father, and in the end died either from the effect of the torture or by assassination. For sympathizing with Alexis, the Princess Golitsyn, the bosom companion of the Empress Catherine, was publicly whipped by soldiers. For the same reason the brother of his first wife, Eudoxia—who he had thrown into prison—was tortured and then torn in pieces on the wheel. Nothing ever told of Nero is more horribly grotesque than this, yet this man, a monster rather, is paraded before the world as Peter the Great.
