The Downfall of Caillaux

friends .- COM.

One of the biggest political sensations known to France in a generation is predicted by the New York World's Paris correspondent if Joseph Caillaux, former Minister of Finance. carries the fight to his opponents and brings into the French Senate the names and records of certain French bankers who are accused of speculating in francs and of transferring funds abroad, which is contrary to law. According to this writer, the resignation on October 27 of the French Cabinet. including M. Caillaux, was a nip-andtuck affair, and might not have happened if France's Finance Minister had been able to take action against certain French bankers before they caused his downfall. "Beneath the battle of politics resulting in the resignation of the Painleve Government, following the refusal of M. Caillaux to resign alone," adds The Wall Street Journal, "lies a battle between banks." The powerful Banque de Paris, we are told, "has undoubtedly been working for the overthrow of Caillaux, who on taking office last April transferred the State's exchange operations, formerly executed through that institution, to Lazard Freres." Thus for the second time within six months, a French Cabinet has been wrecked on the rocks of finance. Raymond G. G. Carroll, Paris correspondent of the Philadelphia Public Ledger, informs us that "one of the first steps of the new Cabinet will be to reopen the debt negotiations with the United

States." Continues Mr. Carroll: "Joseph Caillaux's is a name that will live long for its many political deals. In the last generation no public man has had a career so varied, so shot through with sensational epi-

"The Finance Minister's Waterloo came when he began to circulate 'informations' concerning a leading baner. At first the banker did not believe that M. Caillaux was his secret enemy. Then came the revelation, based upon conclusive evidence.

"Things began to come out wrong for M. Caillaux. His adroit mentality at last had found its master; he was always outmaneuvered. His debt mission to America ended in a deadlock; his attempt to gain the ears of his own political party at Nice cost him its political backing; and, finally, his own Cabinet associates demanded his resignation, and when he refused, they collectively resigned and forced him into isolation.

"France is not going to crash because M. Caillaux has failed. France is a nation where high intelligence is the rule, rather than the exception. and dropping M. Caillaux is clearing the atomsphere"

The immediate cause of the Cabinet upset, says an Associated Press dispatch from Paris, was Caillaux's refusal to adopt his party's plan for the restoration of the country's finances. based upon taking 10 per cent. of the acquired wealth of the country-a capital levy-for the Treasury. In other words, while the previous Cabinet was overthrown because Premier Herriott championed a capital levy, the Painleve Cabinet resigned because its Finance Minister rejected such a

M. Caillaux, writes Hugh O'Connor in the New York World, hoped to remain long enough in power to balance the budget by increasing taxes. Instead, he was compelled to raise the salaries of all government employees, and the French Government added to his troubles by carrying on expensive wars in Syria and in Morocco. While no Paris correspondent ventures to say how much direct influence M. Caillaux's failure to make a debt settlement at Washington had on his fall, Edwin L. James, Paris correspondent of the New York Times, declares that "a successful imaginable event, would have kept him in office for some time." At the moment, adds Mr. James, "Calilaux is definitely 'out," but national politics has not heard the last of this most romantic of all French statesmen. He now returns to the Senate perfectly free, and not rithout friends and supporters."
