

The Semi-ready frock coat is a masterpiece of sartorial art

The frock coat gives the designer more scope to show his skill and taste than any other garment. That is why the tailor, who makes about five or six frock coats in a year and gets his ideas from a fashion plate, misses the essential points that mean style.

The lines of the Semi-ready frock coat are carefully thought out by an expert designer.

This year the Semi-ready frock coat differs but slightly from last year's model. The lapels are heavier with a slightly convex crease. The shoulders are a little broader and of natural shape, avoiding the built-up effect.

They are close-fitting at the waist, large-chested, and with considerable bell to the skirt.

A frock coat is like a dress coat—every line must be right or it is noticeably incorrect.

The Semi-ready frock coat is the essence of style—try one on and see. Prices, \$20, \$25, \$30.

LIVE STOCK MARKETS.

OLD COUNTRY PRICES.

LONDON, May 17.—Cattle are quoted at 11c to 12c per lb. for refrigerator beef, 9c to 10c per lb. for sheep, 12c to 14c per lb. for hogs.

TORONTO, May 18.—There were 90 loads in today, including 1,400 cattle, 250 sheep and lambs, 1,800 hogs and 212 calves. Quotations:

Export cattle, choice, cwt.	\$5.75
Export cattle, medium, cwt.	\$5.50
Export cattle, light, cwt.	\$5.25
Export hogs, choice, cwt.	\$4.75
Export hogs, medium, cwt.	\$4.50
Export hogs, light, cwt.	\$4.25
Butcher's cattle, choice, cwt.	\$5.50
Butcher's cattle, medium, cwt.	\$5.25
Butcher's cattle, light, cwt.	\$5.00
Butcher's hogs, choice, cwt.	\$4.50
Butcher's hogs, medium, cwt.	\$4.25
Butcher's hogs, light, cwt.	\$4.00
Feeders, short-keep, cwt.	\$3.75
Feeders, light, cwt.	\$3.50
Stockers, cwt.	\$3.25
Milk cows, choice, each	\$50.00
Milk cows, medium, each	\$45.00
Milk cows, light, each	\$40.00
Springers, each	\$45.00
Export ewes, cwt.	\$3.50
Export ewes, medium, cwt.	\$3.25
Export ewes, light, cwt.	\$3.00
Yearlings, grain, medium, cwt.	\$4.00
Yearlings, grain, light, cwt.	\$3.75
Sheep, lambs, each	\$3.50
Calves, cwt.	\$3.00
Calves, cwt.	\$2.75
Hogs, singlers, off cars, cwt.	\$6.85
Hogs, singlers, off cars, cwt.	\$6.60
Hogs, singlers, off cars, cwt.	\$6.35
The quality of the feed has been fairly good; trade was dull for shipping cattle; head choice butchers are selling fairly well, but medium or common are slow; milk cows are selling well and are in demand.	

BEAN MARKET.

DETROIT.

Detroit, May 17.—Beans—May 1 car at \$1.66; June, \$1.68; July, 1 car at \$1.70; October, \$1.55.

HAY MARKET.
TORONTO.
Toronto, May 17.—Baled Hay—Firm in tone, on account of the high receipts; prices are unchanged, at \$8.50 to \$9 per ton for No. 1 timothy, and \$7 for mixed clover on track here.

Baled Straw—Car lots on track here are quoted steady at \$6 per ton.

PRODUCE MARKET.

TORONTO.

Toronto, May 18.—Wheat—The market has a better tone and prices are firmer; Ontario, No. 2 red and white, 96c; No. 3 red and white, 94c; Manitoba, No. 1 northern is quoted at 95c to 96c; No. 2 at 93c to 94c; No. 3 at 91c to 92c; at lake ports.

Flour—Ontario 90 per cent patents, \$1.25 to \$1.45; in buyers' sacks, 15c to 20c higher for choice; Manitoba, \$5.40 to \$5.50 for first patents and \$5 to \$5.10 for bakers. Millfeed—Easy, at \$15 to \$15.50 for bran and \$17 to \$17.50 for shorts; Manitoba, \$15 for bran and \$16 for shorts, at Toronto and equal points.

Barley—Steady, at 45c for No. 2, 46c for No. 3 extra, and 47c for No. 1 malting, outside, Toronto freights.

Oats—Normal, at 60c to 70c for No. 2, 60c, outside.

Corn—Canadian, 4c to 7c and 6c for mixed, Chatham freights; American, No. 2 yellow, 4c to 5c; No. 3 yellow, 3c to 4c; No. 4 yellow, 2c to 3c, on track at Toronto.

Onions, 2c to 4c, west.

Rolls Oats—Cars of bags at \$1.25 and barrels at \$1.40, on track here; 25c more.

REASON NO 52

WHY YOU SHOULD USE

Red Rose Tea

Because it is Economical.

Red Rose Tea is composed of what are known in the trade as "high-grown" Ceylon and Indian teas. These teas are grown at high altitudes on the mountain slopes, where the tea bushes grow more slowly and are more carefully cultivated than in the valleys, where the climate is warm and humid.

High-grown tea is not only a finer quality, but contains much more tea juice or extract than valley-grown tea.

This can be easily proved by comparing a drawing of Red Rose with any other tea. By doing so you will find that a pound of Red Rose Tea will spend as far as 1 1/4 to 1 1/2 lbs. of other teas.

The saving is most apparent in the Blue Label and better grades—buy a pound and make the test.

SPRINGBANK WATER

Continued from page 1.

board. The letter stated that though the report alleged that only two cases of typhoid fever had broken out in Port Stanley, if the investigators had seen a little farther, they would have found that no less than five employees of the Fraser House had been taken ill with the disease, but no sooner did they become ill than they were sent to the hospitals in London. Sometimes they were shipped to this city inside of 24 hours. It is peculiar, too, the letter pointed out, that only those persons who drank from the well on the heights were stricken with the disease. Those who did not go up on the hill did not suffer an attack.

"I can say also," said Dr. English, "that fully 85 and perhaps 95 per cent of the cases which made their appearance in London, were of children who were members of the two Sunday schools which picked up at the Port on July 20.

"Undoubtedly there are some grounds for suspicion that our water may not be all it should be, but the great mass of evidence goes to show that the typhoid outbreak of last year was caused by Port Stanley water."

"Do you think there is any danger to the purity of the water because of the fact that the people are allowed to use the ground down the river as a park?"

"Yes. There is always danger from closets and the like. But we have guards there against danger, and a guard against it. All superficial water is carried to the river in tiles. It is only in the spring during very long, continued rains that these materials could be washed into the ponds."

"Would you say that Springbank Park should be closed up?"

"No. I would not. The spring some snow water from the picnic grounds drains into the ponds, but if we were going to suffer infection from this source, the water would be dangerous. The period for infection from this source has now passed."

Dr. Hutchinson's books were then produced, and it was shown that London since the 7th of January. The only two cases reported this year occurred in this house. The people used city water.

Dr. English also drew attention to the fact that no matter how pure a water supply may be, certain conditions of a greater or lesser degree, and an analysis of it taken at such times would be liable to lead to the conclusion that the water was impure. But, as a matter of fact, such a test would not be taken by an expert as a certain city water, the doctor said, "I know a certain city water," the doctor said, "the water supply of which has frequently shown traces of pollution, but it is not our opinion that there is any reason to judge that this was very reason to judge that this was the examination made of the waters as shown in the London supply."

Major Campbell's Views.

Major Campbell was much put out because the report had been published. Like Dr. English, he feels that it will do the city no good. He is absolutely sure that London's water supply is polluted.

"There is nothing in the report," said his worship, "one of the proofs of the purity of the water supply, so far as surface water is concerned, lies in the fact that we have had no cases of typhoid this spring. If the story were true, we would have had it ere this spring."

"Then you do not agree with the report as it stands?"

"No, certainly not; I do not agree with it at all. It is absolutely erroneous. The trouble is that the story is always magnified by our investigations. He is prone to magnify the symptoms he observed. I do not say the Springbank water is absolutely pure, but I do say it is the purest in the country."

"You think it absolutely safe for the people to drink it?"

"Unquestionably so. There is no purer water for the people to drink on the continent of America. And I say this as one who has given a great deal of attention for many years to sanitary science."

"You do not think it necessary for the people to give up Springbank Park in order to keep the water supply pure?"

"No. I do not."

Chairman Darch Emphatic.

Chairman Darch was also very emphatic in his views.

"If the water does overflow from the river into one of the collecting ponds, I can tell you that before that pond is used it is thoroughly cleaned," he told the report. "I do not think it is necessary for the people to give up Springbank Park in order to keep the water supply pure."

"No. I do not."

An old gossip sweeps up more dirt than a new broom.

water, the water in the cases would have made their appearance before Aug. 4, but the statistics of the London authorities show that only three cases were reported up to that date, and up till Aug. 18, only 65 cases, or 45 per cent, were reported, and the remaining 77 cases, or 55 per cent, were reported at different dates from Aug. 20 until Sept. 29—a fact which, the report says, clearly demonstrates that the contentment of the London authorities is absurd.

The report also draws attention to the fact that according to population, more people from St. Thomas visited Port Stanley last summer than from London, and were thus exposed to the dangers of contagion; yet the case rate in St. Thomas was only 6.9 to the 10,000 of population, while in London it was 27.3. In this connection it is shown that each person in St. Thomas made 2.31 trips to the Port, as against 1.77 by each Londoner.

As to the Springbank water, the report says it is as bad as it would be possible to find in a village of a similar size, and yet only two cases of fever were reported.

St. Thomas water, taken from Kettle Creek and filtered, is declared to be fairly good.

London Water Polluted.

Of the six samples of London water submitted for analysis by Dr. Hutchinson, the report says, "The water contained coliform bacilli, and one of coliform bacilli. Both of the first-named infected samples were taken from the ponds from which the water is pumped, and the third was taken from the pond west of the pump-house. In all three specimens the amount of chlorine was below the standard."

The report says the health officer claimed the ice supply from the coves, north and south branch of the river, the Clack and the Walker ponds, to be unfit for domestic use, but some of this ice was undoubtedly used by the people of London.

The city is handled without gloves for allowing sewage to be dumped into the river, the sewage being visible along the shore all the way down the river.

Then the inspection of the water supply system is gone into. It is alleged that the river water at the time of the spring freshet, flooded over the tops of two wells situated below the London sewer, and also into one or two of the lower ponds.

The Summing Up.

The report concludes as follows: "After a careful study of the data submitted, and from the results of our own examination, and the London sewerage system and the method of the disposal of the sewage we are of the opinion that the outbreak of typhoid fever of last year was due to the water supply, and not to the infection of a large number of persons at one given date, namely July 20, but rather permanently polluted or unfit to drink."

"I know a certain city water," the doctor said, "the water supply of which has frequently shown traces of pollution, but it is not our opinion that there is any reason to judge that this was very reason to judge that this was the examination made of the waters as shown in the London supply."

"There is nothing in the report," said his worship, "one of the proofs of the purity of the water supply, so far as surface water is concerned, lies in the fact that we have had no cases of typhoid this spring. If the story were true, we would have had it ere this spring."

"Then you do not agree with the report as it stands?"

"No, certainly not; I do not agree with it at all. It is absolutely erroneous. The trouble is that the story is always magnified by our investigations. He is prone to magnify the symptoms he observed. I do not say the Springbank water is absolutely pure, but I do say it is the purest in the country."

"You think it absolutely safe for the people to drink it?"

"Unquestionably so. There is no purer water for the people to drink on the continent of America. And I say this as one who has given a great deal of attention for many years to sanitary science."

"You do not think it necessary for the people to give up Springbank Park in order to keep the water supply pure?"

"No. I do not."

Chairman Darch Emphatic.

Chairman Darch was also very emphatic in his views.

are like wires; if it horses deep and hard, it is plainly the attack of typhoid. Then if you detect a Scotch burr in the creature's remarks as it sings at its work your case is clear. It only remains for you to catch the flea and \$100 is yours.

The facts are briefly these: One of the infected fleas at Dreamland, Coney Island, has played hockey, and a triant officer is in immediate requisition. It is a lady flea, of brown complexion, distinguished for her Dundee accent, and answers to the name of Geraldine. The \$100 is offered as reward for her return.

Geraldine is by nature a coquette, and is believed her sudden disappearance is due to the fact that there are no little boy fleas in her company.

Mr. Stewart, the trainer, had not yet completed Geraldine's training. She was not quite "dead-letter-perfect" in the fashionable walk. Hence she wore about her left ankle a tiny gold chain as thin as a wire, which confined her.

How she contrived to break away is a mystery. As her usual diet is the rich Scotch haddock of Mr. Tatesoft, and she is entertained for her health, you may not recognize her features on sight, the gold chain may even escape your notice, but if you catch the bite, and the identification will be absolute.

SAD ROMANCE OF JULIUS AND MIN.

Smitten by Cupid, Take Horse to Aid in Elopement Are in Jail.

Greenwich, Conn., May 18.—Fair Minerva and Julius are in jail after trying hard for two days to get married. Julius, whose name used to be in the Olympic games, is actually charged with the crime of horse-stealing, and the fair Minerva is charged with trying to get married without her parents' consent when she was only 15 years old.

This Minerva is Minerva Willis, raised on a farm down near Glenville cross-roads. Julius and Minerva were married on a farm at the cross-roads, and 18 years ago. There was a slumbering love between them, but Julius did not know it until Miss Minerva's father told her on Sunday that he was packing up to move to south Norwalk. She told Julius, and he had nothing to suggest but an elopement such as he read about in the papers. Julius, however, had no means, and Minerva admitted he had only a few pennies and that it would be down to luck to leave in a plowing time, but love overcame all scruples and they started to walk. Night fell and found the pair tired and hungry. Miss Minerva found a couch in the haystack of Farmer Jones, and Julius sat awake to guard his goddess.

When morning broke he had an idea. He stole a horse and went to buy some shoes and crackers. He was gone a week, and when he returned, he found Minerva waiting for him. He was a wagon handy, too, and before the cocks were crowing, Minerva and Julius set out behind the pacer. They drove to New Rochelle and then to White Plains, trying to elude the police, but all the parsons were busy.

At dusk Julius latched his horse to a post in Main street and went to buy some shoes and crackers. He was gone a week, and when he returned, he found Minerva waiting for him. He was a wagon handy, too, and before the cocks were crowing, Minerva and Julius set out behind the pacer. They drove to New Rochelle and then to White Plains, trying to elude the police, but all the parsons were busy.

THE absolute purity of the ROYAL BAKING POWDER makes it pre-eminently the most useful and wholesome leavening agent known. It contains no lime, alum, phosphate or ammonia, leaves no acid or alkaline residuum in the food, and its use always insures pure, light and sweet bread, biscuit and cake which are perfectly digestible and wholesome, whether hot or cold, fresh or stale.

Royal Baking Powder has been analyzed by the Chief Health Officers of Great Britain, Canada and the United States who recommend it for its wholesome and economic qualities.
