

J. H. HORSFALL & CO.

SUCCESSORS TO J. R. McLAREN, Jr.

SOLE MANUFACTURERS OF

SHARP'S PATENT SAFETY AUTOMATIC OIL CABINETS.

THE KING OF OIL CABINETS.

At Philadelphia, New York and Boston State Fairs;
Montreal, Toronto, Ottawa and St. John, N.B.,
Exhibitions; and, in fact, wherever
exhibited, these Cabinets

HAVE NEVER FAILED TO CARRY OFF ALL HONORS.

THEIR SAFETY is fully endorsed by all leading Insurance men as being the only Perfect Oil Cabinet made, reducing the danger of fire to a minimum, which is not the case with tin or galvanized iron tanks.

SHARP'S PATENT SAFETY AUTOMATIC OIL CABINETS are made of matched lumber, the material used in their construction being of the best quality. They are Zinc lined with a heavy Lead bottom resting on a double casing of wood. The deleterious effects of all foreign substances contained in oil are completely neutralized by the lead bottom which is only used in these Cabinets. The pumps being made entirely of metal are indestructible.

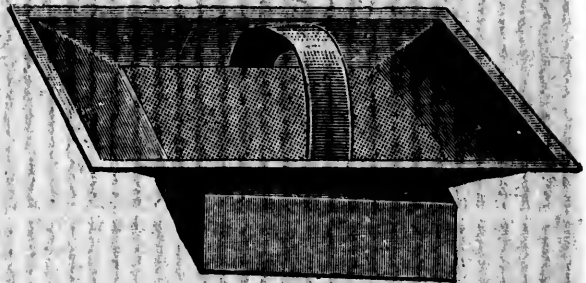

We Warrant them for Ten Years,

thus saving the cost of all repairs, which in the case of all iron tanks would be incurred. They are adapted to Railways, Steamboats, Machinists, Factories, Wholesale and Retail Merchants, Household use, and wherever Oil is used. Having greatly increased our facilities for the manufacture of these Cabinets, we are now enabled to allow a

GREATER DISCOUNT FOR CASH THAN FORMERLY.

THE HYDRAULIC SEAL

must not be taken out, as it prevents anything from dropping in the Tank, and also keeps all obstructions from the Metal Pump.

38 WINDSOR STREET, MONTREAL.
