Can Trees Stop Tornadoes?

The time will come, because human necessity will compel it, when the unnaturally deforested plains of the West will be grand in their growth of noble trees. When they are, tornadoes will be broke in their force by some belt of timber, *chevaux de frise*, which meets and breaks the force of the storm. It is folly to say that the plains will not grow trees. In riding across them any common observer can see where magnificent oaks have survived as a testimonial to the worth of the soil. They stand stately in their silence on solitary knolls, above and beyond the prairie fire. Given the trees, the forest in fact, we have the essentials, the break against the winds, the timber for building, and the firewood, the three crops of which the plains are most in want, but all can be summed up in the words "timber shelter." Trees can stop tornadoes.

Peterborough.

THE DRIVES.—The saw log drives are coming along very slowly this season; none have passed through here since those of Messrs. Rathbun & Son, and Messrs. Ulyott & Saddler, consisting of 200,000 logs; all under the foremanship of Mr. James Lynch, one of the best foremen in the business that runs these waters. The logs were all to be assorted at Harwood on Rice Lake.

THE SHINGLE MILL.—The new raceway is now completed, and when the driving wheel is put into proper order, which will take a few more days, then Mr. Kearns will be making the shingles fly out of the slabs and logs in a hurry, and will keep the packers busy from now until winter.

Lindsay.

FINE TIMBER.—Messrs R. & G. Strickland of Lakofield, have just finished shipping from Lindsay, a large drive of square and board pine timber of 2,472 pieces or 140,000 cubic feet, which they have sold to a firm in Quebec at \$3.50, per foot delivered. This is undoubtedly the finest lot of timber that has been shipped over the Midland Railway this season.

BIG LOADING.—On Monday the 10th July, Mr. John Buller, of the Midland Railway, loaded at Lindsay, 21 cars with timber, 10,136 cubic feet, in four hours. Average number of feet per car 4823. Average time per car 11.3-7 minutes.

DURING the past three weeks there has been great activity along the river at Lindsay, owing to the fact that Mr. Irwin and Messrs. R. & G. Strickland were shipping large quantities of timber over the Midland Railway to Port Hope, where it is being rapidly rafted for Quebec. They have just completed shipping two large drives of square and board timber of 4,472 pieces, or 225,000 feet, and Mr. Irwin expects another large drive of 2,300 pieces shortly.

USELESS FRUIT.—To worry about any Liver, or Kidney or Urinary Trouble, especially Bright's Disease or Diabetes, as Hop Bitters never fails of a cure when a cure is possible. We know this.

C. BRITTON, Lindsay, Ont., writes:—"I have much pleasure in recommending Baxter's Mandrake Bitters in all cases of Jaundice, Biliousness, Sick Headache and Liver Complaint, for they have given universal satisfaction, and I have sold more of them the past season than any other one patent medicine."

Frauds by a Lumber Firm.

DETROIT, July 7.—The well-known lumber firm of King, Quick & King, doing a heavy business at the village of Lowell, were arrested by the sheriff charged with the larceny of logs from Flat River. The complainants are the Michigan Barrel Company, of Grand Rapids, White & Freant, of Grand Haven, and others. It is alleged that during the past three years no less than \$20,000 worth of logs have been stolen from Flat river. Detectives have for some time past been engaged on the case.

An Ottawa correspondent, dating July 7th, says:—Since the first of July there passed through the Madawaska slides 247 cribs, containing 5,769 pieces of timber. Since the 3rd instant, there has left Ottawa 765 cribs containing 14,620 pieces of white pine and 4,859 pieces of red pine. Since the 3rd instant, there has left Gatineau boom 17,892 saw logs, 1,557 pieces of cedar, and 6,632 railway ties.

MALTOPEPSYN

Artificial Gastric Juice.

A WONDERFUL FACT, proving the remarkable digestive power of Maltopepsyn.

Two doses (30 grains), of Maltopepsyn will digest the entire white of a hard boiled egg in a bottle of water, in from 3 to 4 hours. How much more will it digest in the stomach assisted by that organ? About twenty times the quantity.

Test this for yourselves—it is an interesting and useful experiment.

Get from your druggist ten drops of Hydrochloric Acid in a four ounce bottle, fill bottle half full of tepid water (distilled water is best, though soft water will do), then add the finely cut white of a hard boiled egg, then add two doses (30 grains) of Maltopepsyn and shake bottle thoroughly every 15 or 20 minutes, keep the bottle warm, as near the temperature of the body (100° Fahrenheit) as possible, and in 3 to 4 hours the egg will be entirely dissolved or digested.

Maltopepsyn is endorsed by the leading Physicians and Chemists throughout the Dominion of Canada.

Send for Pamphlet, 24 pages, giving full treatment of Dyspepsia with the rules of Diet, etc., mailed free upon application by HAZEN MORSE, TORONTO.

Price per bottle, with dose measure attached, 50 cents, contains 48 doses or about one cent per dose.

GRATEFUL—COMFORTING.

EPPE'S COCOA

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette.

Made simply with boiling water or milk. Sold in packets and tins only (4-lb. and 1-lb.) labelled JAMES EPPE & CO., Homoeopathic Chemists, London England.

TO MILLMEN!

HODGSON'S Patent Saw Grinder

Is a new, efficient, and exceedingly cheap machine and is equally well adapted to grinding long and round just were wanted as easily as a file. It is just THE THING for mills, cutting from one to five million feet of lumber, and costs no more than one-fourth to one-tenth the price of little better machines. It is patented in United States and Canada, and is made in Weymouth, Pennsylvania, and in Amherst, Nova Scotia.

Hodgson's Patent Monitor Shingle Machine

combines, at a moderate price, more points of excellence than any other. Jointer is built in machine, a few inches from the saw. The cast steel feed rolls are opened by a foot lever, and grip the block like a vice. Traverse of carriage to suit large or small stock, is under control of operator when running. Will run for days without cutting a shingle. Warranted to cut, with one attendant, three thousand in an hour, under forfeiture of \$100. Send for circulars.
