We offer figures of several species, as follows :—*Cicindela sexguttata* (fig. 12), *C. purpurea* (fig. 13), *C. generosa* (fig. 14), *C. vulgaris* (fig. 15), and *C. hirticollis* (fig. 16).

By request of the Editor, a list of other species and varieties reported from the Dominion is subjoined, with localities. They are not included in the table because they are not known from Old Canada, and our knowledge of the fauna of the great region north of the forty-ninth parallel and west of the ninety-fifth meridian is too limited to permit of a synoptic treatment of any completeness. For several unpublished records I am indebted to the kindness of Mr. Harrington and Mr. Fletcher, who sent me lists of the species contained in their collections.
