

promptly changes all this. If there is a 'sleepy uterus' antkamnia and quinine awake every energy, muscular and nervous, and push labor to an early safe conclusion. Indeed, in any case of labor small doses are helpful, confirming efforts of nature and shortening duration of process. I have just finished treatment of an obstinate case of vomiting in pregnancy. A week ago the first dose of antkamnia was given, nervous excitement, mental worry and gastric intolerance rapidly yielded. This case was a typical one and the result is clearly attributable to the masterful influence of your preparation. If there is any one drug or preparation that can be made to answer every need of the physician, for the correction of the multitudinous disturbances of innervation that occur in the various diseases he is called upon to treat, that one is antkamnia."

J. E. O'Connor, M.B., B.Ch., Leicester, England, says: "In a case of urethritis accompanied by cervical cystitis and urethral synovitis, the administration of Sanmetto was attended with most satisfactory results. The drug appears

to relieve the pain, reduce the irritation, and produce healing and cessation of the muco-purulent discharge more speedily and efficaciously than any other remedy yet offered to the profession. In the case alluded to, a marked improvement in the condition of the affected portion of the urinary tract was speedily followed by disappearance of the arthritic trouble. The patient had previously been treated with santal oil, salicylate of soda and acetate of potash."

NOCTURNAL ENURESIS :

R Liquoris atropinæ sulphatis... ʒiiss.
Liquoris strychninæ hydro-
chloratis..... ʒi xlv.
Syrupi aurantii..... ad ʒj.

No drink to be taken after 6 p.m. : 5 drops of syrup at 9 p.m. Increase by 5 drops every three nights until 50 drops of the solution be taken nightly, or more if necessary. The secret of success, in obstinate cases treated by the author, was courageous overdosing.—*Medical Times and Hospital Gazette.*

LAKEHURST SANITARIUM

OAKVILLE, ONT.

FOR THE TREATMENT OF

INEBRIETY

(Habitual and Periodical.)

MORPHINE, and other

DRUG HABITS and

NERVOUS DISEASES

PHYSICIANS generally now concede that these diseases cannot be treated with entire success except under the conditions afforded by some FIRST-CLASS SANITARIUM. Such an institution should be a valuable auxiliary to the practice of every physician who may have patients suffering from any form of these complaints, who are seeking not relief merely, but entire restoration to health. The treatment at LAKEHURST SANITARIUM rarely fails to produce the most gratifying results, being scientific, invigorating, thorough, productive of no after ill-effects, and pleasant to the patient. The usual time required to effect a complete cure is four to six weeks.

LAKEHURST PARK is a well-wooded expanse of several acres extent, overlooking Lake Ontario, affording the utmost privacy if desired, and the surroundings are of the most picturesque description. The sanitarium is fully equipped with every necessary appliance for the care, comfort, convenience and recreation of patients. Terms upon application to
