Ms. Audrey Karass, Vice President

Products

Banding-polyester
Rope, cordage, and twine, of man-made fibre
Safety products
Strapping-polyester
Tools - tensioners

Company/Product Information

Founded 1954, Caristrap specializes in developing, manufacturing, and marketing strapping systems for specialized applications and the transport of goods.

Caristrap has grown steadily and has earned a key position in the market, due to its ability to develop versatile and cost competitive solutions that respond to ever changing customer requirements. As a result, Caristrap products are being used around the world and patents in 45 countries protect many of its inventions.

Caristrap has focused its customer-oriented expertise on two product groups: Weatherguard and Caritape. Weatherguard is a simple, high-strength, non-metallic strapping system for the transport and storage of goods. This "synthetic steel flat rope" is available in various sizes and strengths. The Caritape family offers versatile solutions for special applications using non-woven materials. These products can be made of oriented fibres of heat resistant, insulation fibreglass, recyclable paper, heat shrinkable polyester, cotton or other special materials such as kevlar and carbon fibres. Both product lines provide cost effective solutions. Caristrap products are environmentally safe, user friendly, lightweight, strong and yet non-damaging to delicate surfaces. Most can be customized through colour coding or logo printing.

Caristrap customers are as diversified as the applications for its products. Typical Weatherguard users include sawmills, wood treaters, pulp and paper manufacturers, glass and defence industries. Caritape and specialized Weatherguard materials solve mining, kraft paper, motor and transformer production problems.

As a service to customers, Caristrap provides technical advice, training, development and testing of new solutions. Caristrap facilities include a highly integrated factory, proprietary machinery, a development and testing laboratory, a product display room and an ample inventory of standard products. Caristrap is committed to a quality assurance program and to continuous improvement of its products that are all backed by a factory warranty. Today, Caristrap's world-class position has been confirmed by endorsements by the respected Association of American Railroads (AAR) and NATO.

Caristrap services customers throughout Canada and exports to the USA, EEC, Japan, India, Australia, Mexico and the Caribbean.
