

- Nuclear Science:

The S&TC has been heavily involved in promoting issues relating to Canada's position on Iter, as Iter Canada is attempting to host this international bigscience initiative in Canada, offering a site in Clarington, Ontario.

- Other Issues:

S&TC actively promotes Japan's very visible science awards such as the Japan Prize, the Honda Prize and the Blue Planet Award to the S&T community in Canada, so as to enhance the awareness in Japan of Canada's research expertise.
