Commercial Reports Wheat Market on Up Grade On Favorable Developments

Marked Turn for Better in Cash Wheat Situation and Future Respond With Higher Prices—Shorts Run to Cover.

CHICAGO, Oct. 30.—Millers buying large quantities of cash wheat here today helped give the market a decided lift. The close was steady at 1-1/4 to 5-8 to 3-4 net advance. Corn finished 1-1/4 to 1-1/2 higher than Saturday, and oats up 1-1/4 to 1-1/2. Latest trading showed hog products varying from 2-1/2 to 3-1/2 to a gain of a nickel.

The cash wheat sales were said to be the largest of the season in Chicago. One broker alone disposed of 30,000 bushels, mainly No. 2 red winter. In this connection the fact was noted that the stock of wheat in this city had decreased more than 600,000 bushels in the last week. It was also noted that the stock of wheat in this city had decreased more than 600,000 bushels in the last week. It was also noted that the stock of wheat in this city had decreased more than 600,000 bushels in the last week.

Corn Prices Climbed.
Unexpected wet weather over much of the corn belt interfered with the free movement of new grain from the country, and tended to make prices climb. Furthermore the visible supply showed a good-sized decrease. December ranged between 83 3/4 and 84 1/4, closing 1-1/2 net higher at 84 1/4. Cash grades were in fair demand. Oats ranged between 24 1/4 and 24 3/4, closing 1-1/4 net higher at 24 3/4. The shipping trade was dull again. High and low limits for December proved to be 47 1/4 and 47 3/4, with the close a shade up at 47 3/4.

SOME IMPROVEMENT IN CASH WHEAT TRADE Hollinger Lower in New York Advances Shown in Some Issues

Northwest Reports Contain More Optimistic Note—Brokers' Comment on Situation.

J. P. Bickell & Co. had the following from Logan & Bryan:

Wheat—There was very clear evidence that the cash wheat trade was improving. Demand is felt in the local cash wheat trade. This cash business was back of the good trading displayed in the speculative market late in the session. At no time during the morning did wheat futures sell more than a small fraction under the closing price of Saturday. Northwest receipts continue heavy and grading poor. Minneapolis claimed reports from country elevator points of increased offerings of wheat. Regarding the situation in the local cash wheat trade, the local feeling following the break last week was too bearish and the improvement in the local cash wheat trade was too small to be of much importance.

Prices of Silver.
The Porcupine issue was decidedly dull and irregular, with both declines and advances in evidence in the New York curb market today, which, the Canadian exchanges being closed for the holiday, was the only board wherein any trading was done.

There was not much interest taken locally in price movements in the mining issues in New York, the fact that the exchange across the border takes its cue largely from the prevailing attitude of the domestic market being a guarantee enough that no material changes would eventuate when the Toronto board was not open for business. A few local traders gathered round the board in the office having direct connection with New York, but little enthusiasm was evinced as the narrow trading was observed.

SILVER IN PORCUPINE GOOD INDICATION
Discovery of Silica in Quartz a Geological Argument for Permanence of Gold Values.

PORCUPINE, Oct. 27.—(From Our Special Correspondent.)—The discovery of silica in quartz, a geological argument for the permanence of gold values, was the subject of a report from the Porcupine Mining Company. The report states that the discovery of silica in quartz is a geological argument for the permanence of gold values. THE RISE IN SILVER
Due Not to Chinese Revolt, But to Indian Purchases.

Commenting on the sharp rise in silver in the market, ended Oct. 30, *Moscato* & *Goldsmith* of London say:

"Instead of the weekly maximum fluctuation of 1-1/2 per cent, which we have seen in the last few weeks, the silver market this week has risen 13-16 per cent since the 15th of the month, the quotation today being 25 1/16 per ounce. The rise has been largely attributed to the rebellion in China, which seems to have interfered with the momentary supply of the metal to the market. The market, however, has really been for Indian and other speculators who have for many weeks been buying in anticipation of the Indian Government coming into the market. The market, however, has really been for Indian and other speculators who have for many weeks been buying in anticipation of the Indian Government coming into the market."
