agement of the several mines. There are considerable reserves of coal on bank, but not as much as at the date of our last report. The physical condi-tion of the collieries, both above and below ground, is very good, and the present rate of output appears likely to be maintained. The coal requirements of the trans-ports and other vessels of the nava service created a new and large demand; and the extraordinary development of the war business of the steel companie at Sydney and New Glasgow, and of other manufacturing concerns, has led to unusually large local consumption. For these reasons the shipments of Nova Scotia coal to St. Lawrence points fell off about 50 per cent. The price of coal at the mines advanced from \$3,00 to 58.75 but so the steel comparise fell off about 50 per cent. fell off about 50 per cent. The price of coal at the mines advanced from \$3.00 to \$3.75, but as wages and other items entering into cost of production have also increased, the advance was not considered out of the way. The other mining industries show no important changes and have yielded av-erage results. Almost all our manufacturing estab-lishments have felt the influence of the
