

SAYS DEADLOCK SHOULD BE BROKEN

Suggestion of Friendly Overtures to Germany

New York Banker Says U. S. and Britain Should Do It—Holds Time is Ripe for Taking Action.

Speaking before the Empire Club of Canada at Toronto, yesterday, Dr. Benjamin M. Anderson, Jr., economist of the Chase National Bank of New York, urged that the British Empire and the United States should make friendly overtures to France, Belgium and Germany, in an effort to bring about a settlement of the difficulties growing out of the reparations question and the occupation of the Ruhr. He said that the British Empire and the United States have largely recovered from war psychology, whereas France and Germany are both still under the excitement and bitterness and terrible tension of feeling of the war. He said that the British Empire and the United States are in a position to make friendly overtures to France, Belgium and Germany, in an effort to bring about a settlement of the difficulties growing out of the reparations question and the occupation of the Ruhr. He said that the British Empire and the United States are in a position to make friendly overtures to France, Belgium and Germany, in an effort to bring about a settlement of the difficulties growing out of the reparations question and the occupation of the Ruhr.

Anderson expressed grave doubt of the ability of France and Germany to settle their differences alone, though saying that the best possible solution would be worked out directly between France and Germany, involving terms which both countries regarded as equitable and just. He felt that France had been more moderate in victory than Germany would have been in victory, but still felt that public sentiment in France was not such as to make it possible for her to consider her own long time interests in a realistic way. France has right to security against future German aggression, and France must have as much reparations money from Germany as Germany is capable of paying, but the calm consideration of these two main points is

essential.

Dizzy Spells Are Usually Due to Constipation

When you are constipated, not enough of Nature's lubricating liquid is produced in the bowels to keep the food waste soft and moving. Doctor's prescribe Nujol because it acts like this natural lubricant and thus secures regular bowel movements. Nature's own method—lubrication.

Nujol is a lubricant—not a medicine or laxative—so cannot grip. Try it today.

Nujol

A LUBRICANT—NOT A LAXATIVE

GILLETT'S LYE

Comparatively few people realize to what extent Gillett's Lye can be used to advantage in every home.

For instance, with one can of Gillett's Lye and five and a half pounds of lard or grease, ten pounds of good hard soap can be made.

Use one tablespoon Gillett's Lye in gallon of water for cleaning and disinfecting refrigerators, sinks, garbage cans, tiled floors, baths and toilets.

Useful for over 500 purposes.

ELIXIR OF LIFE DISCOVERED IN SHEEP GLANDS

Adrenalin, Powerful Astringent Which Routs Death, Has Stood Unrecognized Years in Medicine Chest.

(New York Tribune)

A cheap, colorless solution that has its place in the physician's medicine chest for some years suddenly has been put to miraculous uses, making the heart beat when a pulse of life had seemed to flicker out. With the restoration of several newborn babies whose lives seemed to have been forfeited, the possibilities of adrenalin are only beginning to be guessed. It is likely to be called into use extensively in the future, but the physicians have used it effectively to make the unskilled should let it alone. The present physician must make a lightning judgment on when and how to use it. So little is known about it, however, that there is ample room for experimentation.

A case was reported last Thursday when three injections were required to restore life in the dead baby born to Mrs. James Miller, of Belmont, N. J. Each time the heart beat for a few minutes and then gave out. The third injection was a strong one of 100 milligrams, and this time the infant heart took up its work and the baby is now quite normal. The preceding case was that of the Sherwin baby brought to life in the Brownsville and East New York Hospital, Brooklyn.

A few weeks earlier, Dr. Philip Minberg, of the Park Maternity Hospital, Brooklyn, reported the first success of this kind recorded, when he succeeded in bringing one of the Isaacson twins to life. In Detroit a baby was restored for six hours by the same means, but in this instance the thread of life seemed to frail to endure and the baby died. All the physicians involved are of the opinion that before long adrenalin will be widely used for this purpose.

It was a bold move to apply it in the first place, but the whole operation

was a success.

Adrenalin is a powerful astringent which routs death, has stood unrecognized years in medicine chest.
