A WEEKLY NEWS LETTER.

HOUSE ALL BUILT

THEN the time is considered opportune for organization of any new branches, the International Trade Union movement is ever found ready to give the helping hand and the benefit to newcomers into labor organized the valuable asset of experience gained through its years of schooling. Though, naturally, we may be inclined to place our own International movement in the forefront in this particular of valuable assistance to workers who are about to make entry, it can be granted that we have no corner of the helping hand. It is a general plank where the trade union movement has root, to have the open door policy and free access given to the machinery already in commission. To this means may be ascribed the more rapid go wth of recent acquisitions, whether considered from success gained in direct and personal LADY GARMENT WORKERS BE-way or in the rapid covering of territory. way or in the rapid covering of territory.

One of the first lessons that the members of a newly organized branch of industry has brought home is that the movement is not simply a wage increasing machine, but it has ramifications, lacking theory, following along a scientific line of advancement. A humanitarian plank is placed in its objective as immovable, tra as the Rock of Gibraltar, along with its other fundamental principles, which have awakened the world to acknowledge its necessity and the handmaiden to de-

sirable progress.

In the travel on the hard, hard road of securing fair recompense for labor expended, time has been found to cover every conceivable path that gives promise to produce desired results to the toiler. Selfishness was forgotten in its general application of endeavor, with the good of all the tape to be breasted. There is no attempt to follow along sentimental lines, but the practical and scientific at all times evident, This is seen in one form when we follow the crafts in the seen in one form when we follow the crafts in the seen in one form when we follow the better work.

In the travel on the hard, hard road of securing as never before that the workers in Europe and every part of the gurment workers in Europe and every part of the line of the superiority of the superiority of the latest that their standards be not lower than our own.

There is no reason why the next few years should not see the formation of such and from this and other indications it is reasonable to expect that shortly it will lominate foreign markets.

SENT HAIGS ATTACK.

BRITISH TRADES UNIONS RESOLUTION OF the latest to demand and entorce better and the standards and of the proven its superiority of and from this and other indications it is reasonable to expect that shortly it will lominate foreign markets.

SENT HAIGS ATTACK.

BRITISH TRADES UNIONS RESOLUTION OF the same legitimate means that we are legitle and the wind declare that first numbers of unions have kept members on their proven its superiority of the numbers of unions for the radiations and from this and other indications it is reasonable to expect that shortly it will lominate foreign markets.

SENT HAIGS ATTACK.

science presented in its regular monthly journal. It is grant trabe unions growth. similar fashion, or the typo taking up the regularly we similar fashion, or the typo taking up the regularly prepared course. These examples could be continued to the end of the industrial chain, showing the educational work taking a premier place in the movement. This angle disproves self and organization taking its rightful attitude in the making of a higher skill, through scientific adoption. A superior workman is sought and the educational policy of the Labor movement brought into play. To the newcomer within the ranks this is a function generally in the nature of surprise, but valued and readily adopted.

Various branches of industrial life formerly condemned to remain as units have been rid of this fallacy and a knock at the door of the house of organized as now organized labor movement with its constructive programme, its love to employe a definite proportion of ex-soldiers numbers the following communication to the filterational Congress of Working Working Working Month and the about taking its continually rising nigh cost of living we have in almost all of the professions and trades constructive programme, its love for all men and women of labor movement with its constructive programme, its love for all men and women of labor movement with its constructive programme, its love for all men and women of labor movement with its constructive programme, its love for all men and women of labor movement with its constructive programme, its love for all men and women of labor movement with its constructive programme, its love for freedom, justice and democracy will which is not only influenced by rising period of reconstruction and all times thereafter.

Some that following communication to the whole-hearted support of the making on the result of the professions and trades constructive programme, its love for all men and women of labor movement with its constructive programme, its love for all men and women of labor movement with its constructive programme, its love prepared course. These examples could be continued the following the the continued internal

and a knock at the door of the house of organized trade shown the necessity of consolidating forces with the means of carrying out the initiatory work entailed. The union of Domestic Employee the means of carrying out the initiatory work entailed. The union of Domestic Employee workers (Holzarbeiter) union 46,000 and the Woodworkers (Holzarbeiter) union 48,000 and the union of Domestic Employees the union of Acricultural Workers has now organized 183,000 women. system to function. It is now a matter of coming into a house all prepared, thus no surprise should be expressed at the new additional branches being successfully launched or the rapidity of progress attained. Seize this fact that the newcomers accept the fundamentals of the old line trade unionist, seeing through unbiassed onlookers' glasses the genuine movement it has made for progression, and its improvements come along in seasonal times, therefore the ready acceptance of the house as built.
