Them Peruna.

"A Few Doses Helps her letter. Them."

One of the greatest foes with which every family has to contend is our changeable climate. To protect the family from colds and coughs is always a serious problem, and often impossible. Sooner or later it is the inevitable fate of every one to catch cold. Care in avoiding exposure and the use of proper avoiding exposure and the use of proper ldo not know how I could have stood clothing will protect from the frequency and perhaps the severity of colds, but and day, had it not been for Peruna.

This Beautiful Mother may be one of a thousand other little "I cannot help but praise Peruna. I mishaps, but no one is shroud enough to am never without it, and as soon as I always avoid the inevitable catching tind the children have the least cold I

ings more interesting and comprehensive. Some of the leading topics dealt with have been: Growing Seed Grain; Commer-cial Seeds; Soil Cultivation and Crop Roration; Care and Application of Manure; How to Make the Best of an Ordinary Farm; The Bacon Industry; Co-operative Dairying; Dairy Cows, How to Care for Them; A Talk on Feeds and Their Values; Beef Production, and others.

The management of the work throughthe to the work throughthe self-orth of out speaks well for the untiring efforts of the commissioner of agriculture, whose one aim is to advance the interests of ag-

one aim is to advance the interests of agriculture in New Brunswick.

Memramcook, Jan. 22.—The Dorchester Farmers' Institute of this parish held two successful meetings yesterday, at which addresses were delivered by Simpson Rennie, of Toronto, and F. E. Sharp, of Midland, N. B., and L. C. Daigle, dairy superintendent. The first meeting was held at Memramcook, West, and was presided over by Mr. Taylor, president of the institute, who, in opening, referred to the indifference that a great many farmers had in reference to their calling. Helicoved these meetings were going to do a large amount of good. He also thought the government deserved much credit for t large amount of good. He also thought the government deserved much credit for taking hold of this question of agricultural education as they had. The first speaker to be introduced was Mr. Sharp. Mr. Sharp expressed his pleasure at being able again to meet with his brother farmers in this part of the province. After a few preliminary remarks regarding farming generally Mr. Sharp took up his subject of the Summer Care and Feeding of the Dairy Cow. He advised the farmers to grow soiling crops to supplement the pastures in the autumn. Recommending first clover cut green; second, commending first clover cut green; second, a mixture of peas and oats sown at different intervals so as to have them always give them Peruna. A few doses helps green. Third, some early variety of corn, such as Longfellow's or Compton's early. Fourth, roots after the early frosts, as corn had to be all consumed before the

Fourth, roots after the early frosts, as corn had to be all consumed before the frosts. In reference to roots he recommended mangels as preferrable to turnips. A number of questions were asked at the close and very satisfactorily answered.

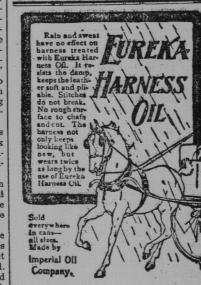

The next speaker was Mr. Rennie, who prefaced his remarks by expressing pleasure at meeting with the farmers of this part of Canada. He gave his experience in the growing of roots, not only for feeding purposes but for exhibition purposes as well. From the prizes he has won he has been the most successful not grower in Ontario and no doubt in the whole of Canada. Mr. Rennie went on to detail his mode of cultivation. He preferred applying the barn yard manure as green as possible and working it well into the soil. He would advise rowing up for roots, but not too high and throwing out about 20 inches apart. He favored a system of sub-soling among the roots in the early stages of their growth which, he believed, to be very beneficial. In planting potatoes he recommended the planting of good sized seeds, cut to one or two eyes in a set. They should be plant-

Vienna, Jan. 21.—A Belgrade despatch and Westmorland Farmers' institute held a successful public meeting at Point de declares the question of succession to the throne of Servia to be ripe for solution, as King Alexander is willing to abdicate in favor of Prince Alexis Karageorgevich, if guaranteed a sufficient pension. In any case, the despatch continues, Prince Alexis Karageorgevich is likely to be proclaimed heir to the throne.

In any case, the despatch continues, show that we cannot expect to do very much more trade with England in cheese but that the prospects are excellent as far as butter is concerned. He then went on

"The ovening session was held in the bublic hall, Dorchester. The institute president gain presided, the meeting being addressed first by the president, next by Mr. Rennie, who was followed by Mr. Daigle and he by Mr. Sharp. The sub-work of the students, not able to own the sing addressed first by the president, next by Mr. Rennie, who was followed by Mr. Daigle and he by Mr. Sharp. The sub-work of the students, not able to own as a the afternion meeting. The usual votes of thanks were again tendered the speakers and the president for so ably presiding over the meeting. Mr. Daigle left in the late train for Moneton. Messers as at the activation of the seminary was swinging his ax against the server which they took the afternion head of the seminary was sw dy bottom. Great was the student's dismay. If it had been his own ax, it would have been bad enough, but the ax did not belong to him. He the ax did not belong to him. He had no means to buy another for the kind man who had loaned it to him, but God helps the helpless, and he generally helps through some good and sympathetic soul, and in this case it was Elisha, wno was in the woods and on the river bank at the time. He did not see the ax head fly off, and so he asked the student where it dropped. He was shown to detail the summer care necessary to get the best results from the dairy cow.

Mr. Sharp also spoke briefly upon the noultry industry, at the close of which he answered a number of questions.

The next speaker was Simpson Rennie, of Toronto. His subject was the feeding or beef for the export trade. Kindness he said to the student had instructed in the student had instructed by the said to the student had instructed by the said to the student had instructed by the student had instructed by the student where it dropped. He was shown the place where it went down into the river. Then Elisha broke off a branch of a tree and threw it into the water, and the ax head rose from the depths of the river and floated to the bank, so that the student where it dropped. He was shown the place where it went down into the river. Then Elisha broke off a branch of a tree and threw it into the water, and the ax head rose from the depths of the river and floated to the bank, so that the student had

just to stoop down and take up the restored property. Now you see the meaning of my text, "The iron did

"What," says some one, "would be the use of such a miracle?" Of vast, of infinite, of eternal importance. Those students were preparing for the ministry. They had joined the theological seminary to get all its advantages. They needed to have their faith strengthened; they needed to be persuaded that God can do exerciting they needed to learn that erything; they needed to learn that God takes notice of little things; that there is no emergency of life where he is not willing to help. Standing on the banks of that Jordan, those students of that day of the recalled ax head had their faith re-enforced, and nothing that they had found out in the classrooms of that learned institution had ever done more in the way of fitting them for their coming profession.

Furthermore, in that scene of the text God sanctions borrowing and sets forth the importance of returning. I do not think there would have been any miracle performed if the young man had owned the ax that slipped the helve. The young man cried out in the hearing of the prophet, "Alas, master, for it was borrowed!" He had a right to borrow. There are times when we have not only a right to borrow, but it is a duty to borrow. There are times when we ought to lend, for Christ in

of the vast fortunes that now over-shadow the land were hatched out of a horrowed dollar. ing implies a return. For what we horrow from God we must pay back in hearty thanks and Christian service, in improvement of ourselves and

helpfulness for others. For whit we borrow in the shape of protection we borrow from our parents in they good example and their hard work wrought for us in our journey from cradle to manhood or womanhood for all the ages to come we ought to be paying back. The halleluiahs of heaven will be returned for crucification agony.

The student wielding that ax in the valley of palms did not steal the implement. He expected to return it, and when he saw that he would not be able to return it he ejaculated the provide I have already quoted, "Alas." wherein all the beasts of the forest do creep forth. The young lions waster, for it was borrowed. There needs to be a more punctilious observance of the duty of returning that which is borrowed. If suddenly all the world would wake up to this duty and borrowed things should go back to their owners, what a revolution in libraries, in homes, in churches, in state and national legislature! What books escaping from shelves where they have no right to stay! What pictures leaving walls! What millions of dollars changing banks, leaving the places where they have no right for places where they have no right to the form of the forth. The young incorped the form of th

books never read and wardrobes that is because kept them in perplexity as to which we do not of many garments was appropriate for the weather that day, were worth for the weather that day, were worth to the world nothing then and have been worth to the world nothing since, while the young men in college who had to economize three months in order to get some book they needed and who could hardly raise money for their diploma, have since wrought mightily for God and the truth, turning the world upside

down because it was wrong side up. In the summer watering places north, south, east and west, in the great hotels, serving at table and in baggage room, are theological stip-Bishop McIlvaines in your pulpits. Let them not now be ashamed of the

ax with which they hew the beam for Elisha's seminary. Those students in the valley palms by the Jordan had a physical strength and hardihood that would help them in their mental and spirit-ual achievements. We who are toiling for the world's betterment need brawn as well as brain, strong bo-dies as well as illumined minds and consecrated souls. Many of those in church and state got muscle and power of endurance from the fact that in early life they were comor hammer, while many who were brought up in luxuries of life give out before the battle is won. They are keen and sharp of mind, but have no physical endurance. They have no physical endurance. the ax head, but not the handle The body is the handle of the soul.
Notice, also, how God is superior
to every law that he has made,
even the strongest law of nature, the

wearing cape of sheepskin, when there was a mighty stir in the air and a flashing equipage descended. Elijah stepped into it, and on wheels of fire, drawn by horses of fire, he rose. Fifty men for three days searched the mountains to see if the body of Elijah had not been dropped among the rocks and picked dropped among the rocks and picked

at by the birds of prey, but the search was in vain. The law gravitation had been defeated. Notice also the divine power in the backwoods. Wonderful things were done at the cities of Jericho and Jerusalem and Babylon and Nineveh, and the great cities of our Nineven, and the grant time have seen the divine power, but this miracle of my text was in the backwoods, far away from the city, in the lumber districts, where the students had gone to cut time the students ha the students had gone to cut timber for the new theological seminary. And if this sermon shall come, as it will come, like my other sermons for the last thirty years, without missing a week, let me say to those far away from the house of God and in the mountain districts that my text shows the divine power in the backwoods. The Lord by every stream as by the Jordan, on as surely as he was on Mount as surely as he was on Mount as surely as he was on Mount as by the one where gushing water slacked the whitst of the march place was rocked and was rocked and your father's grave was dug. Waken-your father's grave was dug. Waken-your may be by lion's

where your cradle was rocked and your father's gravely be by lion's ed though you methor forear or panther's help you, whether forest around you might hurricane or insignificant, like something quite the loss of an ax the time the head. Take your the loss of an ax the time the head. Take your the loss of an ax the time the head. Take your the loss of an ax the beggest liar in the world. The fact is, you don't care a fig for me, or you wouldn't try to deceive me all this time. There was a time when you said I was the best and sweetest woman on earth.

Mr. Manning—And you believe the lift the fibs I tell you new? his sermon on the mount declared, "From him that would borrow of thee turn not thou away." It is thee turn not thou away. It is right that one borrow the means of getting an education, as the young student of my text borrowed the ax. It is right to borrow means for the forwarding of commercial ends. Most

Fredericton Business College,

weather will permit, and after have listened to the solo of a bid have listened to the solo of a bid in the treetops or the long meter in the treetops or the long meter psalm of the thunder, read those words of the Bibte, which must have been written out of doors:

The ceders of Lebanon which he hath planted, where the birds make their nests; as for the stork, the fir trees are her house. The high hills are a refuge for the wild goats and the rocks for the conies. Thou makest darkness, and it is night, wherein all the beasts of the forest do creep forth. The young lions roar after their prey and seek their meat from God. The sun ariseth, they gather themselves together and lay them down in their dens. Man goeth forth unto his work and to his labor until the evening. O Lord, how manifold are the sould be the sould be sould b have listened to the solo of a b.

stay! What pictures leaving walls! What millions of dollars changing banks, leaving the places where they have no right for places where they are due!

Furthermore, let us admire these young men of Elisha's theological seminary for the fact that they were carning their own way. The most of those to-day who are successful in the professions, medicating the sick or advocating the law or preaching the gospel, fought their own way on and up. Those are the kind of men who know what education is worth and know how to use it. Many of us remember that in college days the sons of affluent fathers, with plenty of money to spend and horses to drive and libraries crowded with books never read and wardrobes that books never read and wardrobes that the college days the sons of affluent fathers, with plenty of money to spend and horses to drive and libraries crowded with books never read and wardrobes that the college days the sons of affluent fathers, with plenty of money to spend and wardrobes that books never read and wardrobes that they were they are due to the banks of the Jordan was to blame for not examining the wax before he lifted it that day against a tree. He could in a moment have found out whether the helve and the head were firmly fastened. The simplement for work in good order are believed and the head were firmly fastened. The simplement to the banks of the Jordan was to blame for not examining the ax before he lifted it that day against a tree. He could in a moment have found out whether the helve and the head were firmly fastened. The simplement for work in good order or the strongest stroke that sent the edge into the hard sycamore would not have left the implement to the head was not in good order or the strongest stroke that sent the edge into the hard sycamore would not have left the implement for work in good order or the samining the ax tree. He could in a moment have found out whether the was not in good order or the strongest stroke that it that day against a tree. He could in a before he lifted it t is because we have a dull ax or we do not know how aright to swing it. The head is not aright on the handle. At the time we want the most skill for work and perfect equilibrium we lose our head. We expend in useless excitement the nervous energy that we ought to have employed in direct, straightforward work. Your ax straightforward work. Your ax may be a pen or a type or a yardstick or a scales or a tongue which in legislative hall or business circles or Sabbath class or pulpit is to speak for God and righteousness, but the ax will not be worth much until it has been sharpened on the grindstone of affliction. People who baggage room, are theological students who are in preparation for the ministry, earning in July and August the means by which they may study the other months of the year. I hail them; I cheer them; I bless them. They will be the Herschels in the observatories, the Dr. Motts in your medical colleges, the Rufus grindstone of affiction. People who have had no trouble do not amount to much for usefulness, but God puts their ax on the hard circle of the grindstone, and betrayal gives it a turn, and poverty gives it a turn, and disappointment gives it a turn, and bereavement gives it a your medical colleges, the Rufus choates in your courtrooms, the turn, and bereavement gives it a turn, and now it is sharp enough the ulpits. of the am for the man for the

But I have come to the foot of the Alps, which we must climb before we can see the wide reach of my subject. See in all this theme how the impossibilities may be turned into possibilities. That ax head was sunken in the muddlest river that could be found. The alarmed student of Elisha may know where it went down and may dive for it and perhaps fetch it up, but can the sunken ax head be lifted without a hand thrust deep into the mud at the bottom of the river? No: that is impossible. I admit that is impossible. I admit as human power is conterne impossible, but with God all are possible. After the tree was thrown upon the surface

was thrown upon the surface dan "the iron did swim."
You have a wayward boy.
God knows how you have cried him. You have tried everythin for his reformation. Where is he now—in this city, in this country, or has he crossed the sea? "Oh," you say, "I do not know where he is. He went away in the sulks and did not say where he was going." You mm, without so much as a touch the hard, heavy metal sought the surface. There it is, the floating ax head. What a rebuke to those who reject miracles on the ground that they are contrary to nature, as though the law were stronger than the God who made the law!

Again and again m Bible times was on the banks on the banks of the surface country to make the law! than the God who made the law! Again and again in Bible times was that law revoked! Witness the sene on the banks of the same Jordan, where, in after time, the ax head sank and rose. Elijah stood there, wearing cape of sheepskin, when there was a mighty stir in the air and a flashing equipage descended. Elijah stepped into it, and on wheels of fire, drawn by horses of fire, he rose. Fifty men for three days searched the mountains to see lift the body of Elijah had not been different was the feeling of that harf fist against your face from his littly hand in infancy patting your cheek Father! Mc.her! That is an impossible that I would like to see God take hold of, the conversion of that boy, for he will never be anything but a boy to you, though you should live to see him fifty years of age. Did you say his heart is hard? How hard? Hard as stone? "Yes," you say; 'harder than that. Hard as iron." But here is a God who can lift the here is a God who can lift the soul that has been deepest down. Here is a God who can raise a soul. out of the blackest depths of sin and wretchedness. Here is a God who can make iron swim, the God of Elisha, the God of the you

# INTERPROVINCIAL TRADE

Trade in live stock between eastern and western Canada has been growing rapidly within the last few years. This merease of trade has been promoted, and in fact | made possible, by the wise and generous treatment of the C. P. R. During the month of December and the first eight lays in January 46 cars of grade and purebred cattle were shipped from eastern Canada to British Columbia. These cars contained 2,223 head and cost in the east contained 2,223 head and cost in the east something over \$30,000. Besides these, a considerable number have recently been sent to the Northwest Territories, and orders are now in hand for additional shipments to be made to the last mentioned territory. In order to promote this trade, which has proved very profitable in many districts in eastern Canada, farmers should use first class Shorthorn bulls. By careful selection and wise treatment to the Transvaal by mobile British columns in pursuit of Botha and De Wet, show that quite a number of new auriferous ranges have been discovered.

Jimson—"I understand Schley is retired."

Jester—"Yes, but his enemies are trying to puncture him again."—Columbus (Ohio) State Journal.

females sired by such bulls will prove excellent dairy cows.

It is a noticeable fact that seven-tenths of the stock used for dairy purposes in Great Britain are Shorthorns and Shorthorn grades. Probably the most suitable dairy cow for the average farmer is a Shorthorn-Ayrshire cross. Steers whose The Records Show a Rapidly and dams are strong grade Ayrshire cows if got by a Shorthorn bull prove excellent feeders and very desirable shipping cattle.

New Transvaal Gold Fields.
