

Cost and Service

The two factors considered before a purchase is made.

Steel Truss Barns

measure up to every requirement. They are as sturdy as a skyscraper. They have no cross-beams to hinder unloading or mowing away. They are fire and lightning-proof. They have metal clad, roller doors, lift roof-lights, sliding side windows and "Acorn" ventilators. The cost will compare favorably with a wood frame barn.

Gossip.

Weir's Berkshires.

In renewing their advertising contract for another year Jno. Weir & Son, breeders of improved Berkshire swine at Paris, Ont., report a most successful trade for the season just closed. With the exception of three or four six-months pigs, which they retained to make the county shows, all the young boars have gone, and a number of orders are already booked for some younger ones now coming on. In young sows, however, they have an unusually good lot, all bred to their herd sire, Ring-leader 39234, first-prize aged boar at Toronto this year, and first and champion at London. He is also the sire of all the litters that are now coming on, some of which are old enough to ship. The majority of the breeding sows from which these pigs are bred are descended from Flo Compton of the famous Compton strain from Compton Flower Imp. This strain has produced some excellent types for Mr. Weir. Another family that has also done well with him is the Pudding Charm strain. These were also included in their foundation stock, directly descended from imported sires and dams which place them in a position to furnish pairs or trios not akin. Let them know your wants.

D. C. Flatt & Son Write.

"We are pleased to report that our great cow, Jennie Bonerges Ormsby, has dropped a handsome bull calf. We think this calf as well bred as any bull in Canada, and, as an individual, he is just as good as his breeding. His dam, Jennie Bonerges Ormsby, and sire's dam, which is Loula Keys, are show cows with perfect udders, which counts for much in the selection of a bull. But the good qualities of these two great cows are not all in their individuality. They have both proven themselves great producers. At the age of two years they both made yearly records with the wonderful average of eighteen thousand pounds of milk and seven hundred and fifty-five pounds butter. As mature cows their average seven-day butter record is thirty-four and one-half pounds, their milk seven hundred pounds. Their average thirty-day butter record is one hundred and thirty-seven pounds; their milk twenty-eight hundred and eighty-five pounds. In addition to the above, Jennie Bonerges Ormsby is the only cow in the world to make over thirty pounds of butter a week for five consecutive years. She has just turned ten years old, and has given birth to nine living calves. We think we are right in claiming that her present calf is one of the best bred bulls of the breed."

Trade Topic.

Information has been received in this office to the effect that the ONTARIO WIND ENGINE & PUMP COMPANY, LTD., of Toronto, have made an important change in the selling force of their Ontario Branch. C. S. Milne, who has formerly held an important position with the Page Wire Fence Company, is assuming the position of Sales Manager, commencing some time this month.

As Mr. Milne has been in close touch with farmers during his entire business career of over twenty years, he is thoroughly acquainted with their needs. The Ontario Wind Engine & Pump Company have been peculiarly successful in catering to the requirements of the farming public, particularly along the lines of power and water supply systems, and under Mr. Milne's direction this firm should develop a sales policy which will have unqualified success.

Unanswerable Argument.—"I tell you," said Pat, "the old friends are the best, after all, and, what's more, I can prove it."
"How are you goin' to prove it?"
"Where will you find a new friend that has staid by ye as long as the old ones have?"—Answers.

or lame in the barn, "eating their heads off"? One means profit—the other means loss. When a horse goes lame—develops a Spavin, Curb, Splint, Ringbone—don't risk losing him through neglect—don't run just as great a risk by experimenting with unknown "cures". Get the old reliable standby—

KENDALL'S SPAVIN CURE

Mr. David Yerex, Sonya, Ont., writes—"I have used your Spavin Cure for fifteen years, and know it to be a good cure". Be ready for emergencies, keep a bottle of Kendall's in the barn. Then, if a horse goes lame, you have the remedy on hand to cure the trouble quickly. \$1. a bottle—6 for \$5. at druggists. Individuality

The chief characteristic of a sire is firmly implanted in all our bulls. Some of the best herds in America to-day are headed by bulls bred by us. We have them out of champions, by champions, and champions. Come to us to get a sire if you want to pick from the best in the country to-day. We have them from two hundred dollars up.

Shorthorn Bulls---Shorthorn Females

A HERD THAT YOU WILL LIKE

You will like our females; you will like the breeding and you will like the sires that have been used on these in the past year. Right Sort (Imp.), Bandman (Imp.), Newton Friar (Imp.), Lyton Selection, Escana Champion,—all these bulls have been used in the past year. We can show you some young bulls by these sires that are show calves. Come and see them or let us send you particulars. We can also spare some females bred to them; heifers, four and six-year-old cows, as well as cows with calves at foot.
