

Abdication of Alfonso Being Considered

Situation in Spain Considered Very Grave—Portugal Suppresses Communist Revolt—Nanton Succeeds Osler in Dominion Bank.

ABDICATION OF SPAIN MAY BE CONSIDERED.

LIVERPOOL, Aug. 12. A grave view of the situation in Spain is presented by the special correspondent in Madrid of the Liverpool Post, who telegraphs his paper as follows:—"The news available here today is of a contradictory character, but information from a semi-official source confirms indications of the gravity of the situation in Spain. Besides an arrangement for Premier Primo De Rivera's retirement and the transformation of the Dictatorship into a Constitutional Government, I understand the possible abdication of Alfonso being considered by the King and his Ministers."

MCINTYRE PORCUPINE EXTEND OPERATIONS.
TORONTO, Aug. 12. Commenting on the Ottawa story that McIntyre Porcupine Gold Mines Limited has purchased properties in the Rouyn District for one million dollars, the Toronto Telegram's Financial Editor writes, "The facts of the McIntyre deal are that to-day McIntyre expects to take a working option on the Rouyn claims which aggregate 2,400 acres. If the full option is ever exercised, one million dollars will undoubtedly be paid, but not until 1926, ten years from now. McIntyre will put up virtually no cash at all for eighteen months. During which time however, it will do a stated amount of work on the claims. If this work is satisfactory they will make an initial payment in March, 1926."

EGYPTIAN SOLDIERS CLASH WITH BRITISH.
LONDON, Aug. 12. Ten Egyptian soldiers were killed and nine wounded, in a collision with British troops at Athra, following demonstrations in which Egyptian troops attacked the British with bricks at their barracks, says an Egyptian telegraph despatch from Cairo dated yesterday's date.

RUSSIAN EVACUATION IS THE CRUX.
LONDON, Aug. 12. The Ruhr evacuation question, disposal of which is necessary before the International Conference can proceed in a definite way with the programme for instituting the Dawes reparations plan, is being threshed out in private interviews between the leading delegates from Germany and the Allied nations. The French Premier, M. Herriot, is supposed to have returned from his Paris trip with authority to agree to the evacuation within eleven months, but the question of when the withdrawal is to take place and the details of its execution remain to be settled. With this matter also is bound up the decision regarding the desire of the French and Belgians to retain a number of their men in the Rhineland railway regime, while the Dawes plan is in process of operating. The Germans are insistent in their demands that the railways be turned back under an all German status. Reports from all three committees of the Conference now have been agreed to the principle, and the opinion seems general that the outcome will be definitely settled by Thursday or Friday.

PICTOU PREPARES FOR U. S. FLIERS ARRIVAL.
PICTOU, N.S., Aug. 12. This little town, which is apparently destined to be placed importantly upon the map, by the call to be made here by the globe encircling United States aviators, is preparing to fittingly present itself for the honor. The round the world fliers will find Pictou in gala attire, with by electric illumination at night. Their arrival will be the occasion of a great welcome to be extended to them by representatives of the Governments of the three Maritime Provinces, as well as the local dignitaries, Mayor MacChern and his Council, to say nothing of the representatives from their own country who will be here in large numbers. The United States cruiser Milwaukee and six United States destroyers, which are now in the North, guarding the course of the fliers, are expected to arrive here August 21st.

Wear pretty things twice as often

Launder them twice as often—easily, safely!

It is a shame not to wear lovely, delicate garments often as you'd like—in fear of what laundering may do to them.

Remove the harm from laundering and you can get just twice as much service and pleasure from your very prettiest things!

We have made this possible for you—in Palmolive Princess Soap Flakes. They are flakes of purest, mildest soap. Contain nothing that can injure dainty fabrics. Thousands of women use them for the very finest laundering.

Silks, satins, laces, crepes, chiffons, sheerest voiles—wash them all, with Princess Flakes. See

them come out fresh and new-looking, without harm to fabric or dainty colors.

See bulky woollens done up as fine and fleecy-soft as when new. And, best of all, find out how very economical these snow-white, crinkly flakes are—for washing-machine use and other household tasks. They actually go farther, last longer—besides cleaning better—because they are all soap, pure soap.

Try some. Your dealer has them. Ask for Princess Soap Flakes. In handy one-pound packages, or in bags.

THE PALMOLIVE COMPANY OF CANADA, Limited

according to advice from the State Department at Washington. A Chicago newspaper airplane, bearing a reporter and a cameraman, arrived yesterday afternoon and found safe anchorage in the harbor, and the Boston II, the substitute airplane, being sent North for the use of Lt. Wade, whose machine was wrecked off Iceland, was expected to arrive here sometime to-day.

BRITISH TROOPS FOR SUDAN.

LONDON, Aug. 12.

The British Government has sent a battalion of troops to reinforce the British Garrison in the Sudan, as a result of a clash between Egyptian and British soldiers at Athra, following disturbances in which the Egyptian troops are said to have attacked the British with bricks at their barracks. According to British official despatches the trouble started at Khartoum on Saturday when the military cadets, who paraded with rifles refused to give up their arms upon returning to school. The cadets were surrounded and arrested by British troops. Yesterday Egyptian troops were confined to their barracks from which they attempted to escape, when they attacked the British troops with bricks and other missiles.

HOPE FOR THE NEAR-BLIND.

TORONTO, Aug. 12.

A Mail and Empire special from New York says that falling sight, the result of rheumatic or other infection, or even the penetration of the eyeball, can be arrested within three days by injections of pure cow's milk into the lumbar region of the patient, according to Dr. Edward R. Goodin, of Boston, who arrived here after five months' study in Vienna, of this new discovery by physicians of the hospital attached to the University of Vienna. Dr. Goodin reports that milk injections are a cure for blindness. Those who are already blind, he said, may not hope for the restoration of their sight by this method, but those who are partially blind from infection or penetration, or those in whose eyes the infection has just been discovered, have good reasons to hope that their sight will not get worse, and that sympathetic ophthalmia "infection of the other eye" will be prevented.

RELIEF SHIP CLEAR OF THE ICE.

REYKJAVIK, Iceland, Aug. 12.

Rear Admiral McGruder yesterday flashed a message from his flagship, the Richmond, to the cruiser Raleigh, off the Coast of Greenland, to endeavor to find the Danish steamer Gertrude Rask, and give her all possible assistance in making her way through the ice floes towards Angmagalik to land the supplies she has on board for the Danish expedition.

The order was sent by Admiral McGruder when news reached him that the Gertrude Rask which has been drifting about for more than a week amidst ice floes and unable to reach her destination, at last had broken out of the pick, but was still off the south of Angmagalik. The Iceland trawler, Karl Solmundars, is on her way to pick up the Gertrude Rask for which she has three hundred tons of coal. It is thought the three vessels will meet somewhere this afternoon. The Raleigh on Sunday made her way through small broken fields of ice floes, but while the sea was smooth, intermittent banks of fog along the east coast of Greenland prevented the two reconnaissance planes on board the cruiser from hopping off and making a survey of the coast lines in an endeavor to pick out a safe harbor for the planes of Lieut. Lowell Smith and Lieut. Erik Nelson, to hop off from Reykjavik. In cutting her way through the ice one of the propellers of the Raleigh was slightly damaged. Late yesterday evening the Raleigh, which was about sixty miles off the Greenland Coast, stood out beyond the ice floes in order to insure her safety during the night. If the fog holds off to-day, it is probable that the two planes will be able to take off and determine the possibility of finding a base for the round the world aviators.

ABORTIVE REVOLT IN PORTUGAL.

LISBON, Aug. 12.

An abortive attempt was made yesterday to bring about a radical communist revolt here. A few bombs were thrown, but they caused no damage and several persons were arrested. The police and military are now in control of the city and conditions are normal.

NANTON SUCCEEDS OSLER.

TORONTO, Aug. 12.

At a meeting of the Board of Directors of the Dominion Bank, held today, Sir Augustus M. Nanton, of Winnipeg, a Vice President, was unanimously elected President to succeed the late Sir Edmund Osler. It was announced that in the near future Sir Augustus will leave Winnipeg to take up his permanent residence in Toronto.

BEAVERBROOK IN CANADA.

MONTREAL, Aug. 12.

Lord Beaverbrook, who arrived at his old home, Newmarket, yesterday, spent some days fishing on the Miramichi. He says he is in the Province on pleasure only.

BOSTON LEFT FOR PICTOU.

EASTPORT, Maine, Aug. 12.

The relief plane, Boston II, circled over the harbor here at 10.40 a.m., standard time, to-day, and then headed for Pictou, N.S., 300 miles distant, to await the coming of the army fliers.

land the supplies she has on board for the Danish expedition. The order was sent by Admiral McGruder when news reached him that the Gertrude Rask which has been drifting about for more than a week amidst ice floes and unable to reach her destination, at last had broken out of the pick, but was still off the south of Angmagalik. The Iceland trawler, Karl Solmundars, is on her way to pick up the Gertrude Rask for which she has three hundred tons of coal. It is thought the three vessels will meet somewhere this afternoon. Delicious Chocolate Cherries, Pineapple Ginger and Dates, Dipped Raisins, Burnt Almonds, Small Brazils and Cream Butternuts, Fruit Jellies, Caramels, Orange and Lemon Slices, Tangerine Oranges.

EXTRA SPECIAL.

O.K. Chocolate Creams 55c.

Italian Mixture 35c.

Where to Go To-Day

A HIGH CLASS FEATURE SHOWN AT THE MAJESTIC THEATRE.

Usually every holiday the question is asked, "Where to go to-day?" After the Regatta and Garden Parties the next is the theatre. Well, the fact that a strong, classy feature under the title "The Road to Arcady" is billed at the Majestic leaves but little further consideration on the part of the pleasure seeker. Yes, "The Road to Arcady" is without exception the best photoplay of its kind exhibited for some time. The lead, Virginia Lee, has once more established her claim to be the most accomplished actress in the movies. This beautiful star, as she has often been designated, portrays a most impressive role in this marvellous drama. The story is one that will grip from the beginning to the end and seldom one sees such a combination of pathos, thrills and striking situations. The Majestic screen reel is also in keeping with the feature and the public are advised to see the bill which is a leading attraction to-night. The question is asked, "Where to go to-day?" and the answer is to the Majestic, certainly!

Wars on Parasites Which Attack Trees

Foresters have only scratched the surface in the matter of the elimination of disease to trees in timberlands, according to the report of Dr. J. H. Paul, professor of botany at the University of Toronto, who described methods for warding off the attacks of certain parasites, in a paper delivered in the agriculture section of the British Association to-day. "At the outset we are con-

vinced that the most important factor in the securing of uniform, sustained yields from forests.

Huge quantities of timber, prematurely diseased following on injuries from fire, have been left unharvested, and the amount at present considered unfit amounts to 50 per cent, in certain areas. Experiments are being pushed which aim to make this timber available, and it is likely that such losses will be avoided at least in part," the speaker said.

The systematic study of fungus diseases follows two lines: It is necessary to work out the life history of the parasite which does the damage, and also, to determine at what ages the trees are most susceptible to the attacks of various diseases. The second factor is an important one in the securing of uniform, sustained yields from forests.

When you can't get clean with soap and water

Sometimes dirt gets so "ground in" the pores and tiny wrinkles of the skin upon your hands, that you can't get it out with soap and water. That's when you need a Propyl-lactic Hand Brush.

It's bristle stiff, but non-abrasive. They dig out dirt as no other kind of washing will. Yet the scrubbing is so gentle that it gives the mild massage and exercise to your skin that helps keep it healthy as well as clean.

AT ALL DEALERS.

Propyl-lactic Hand Brush

One does not expect to find a "Mackay" illusion in the Palace of Engineering at Wembley, but crowds of visitors are constantly gathering round the stand of Davidson & Co. Limited, puzzling over a spectacular phenomenon exhibited by this firm. A large rubber ball, about 30 inches diameter, which is inflated with air and weighs 2 lbs., is held in suspension by a single blast of air issuing at the speed of 70 miles an hour from a Sirocco high-pressure fan. The fan nozzle is seen at a certain angle, and the ball is about 4 ft. away from the mouth of the nozzle, and 10 ft. above the floor level. Why is the ball not blown away?

Here is a fascinating riddle to solve, but Davidson & Company offer no prizes for the correct solution.

Have You Seen "A Royal Divorce?"

TO-DAY IS LAST CHANCE TO SEE THIS GREAT FILM.

All who have seen that great film "A Royal Divorce" have been loud in their praise of the true magnificence of the life of Napoleon and the various incidents that go to make his career.

The play, which ran in England for 30 years, was a huge success, but the picture, which witnessed all the intricacies and personality of the play, has the advantage of the opportunity to stage all the big scenes, and the producer, G. B. Samuelson, has spared no money or expense in seizing the opportunity. The Battle of Waterloo, the mightiest conflict of all the centuries, has been staged anew in the film, and a touching and stirring sight it is. We also see the burning of Moscow, the famous city of the Czar. We see Napoleon's famous retreat from that city, with his army of a million, which at the end of the route he reduced to a miserable and struggling 150,000, while all through the long, grim journey, beset by the hunger and extreme cold, the soldiers were dropping off with the last few words on their lips. "Vive L'Empereur!"

And still another big picture is announced by the Nickel. "Rob Roy" is scheduled for exhibition to-morrow. This is the million dollar screen triumph filmed on the actual locations of the story. No amusement-lover can afford to miss this marvellous drama. Watch to-morrow's Telegram for further particulars.

Jackstones Tournament

Two hundred boys and girls met at Bannerman Park yesterday morning to play in the Jackstones Tournament. The boys and girls were first grouped according to age, and then sub-divided into groups of five for playing. The winners of each of these groups then played each other, and so on to the finals.

Bill Davis, 17 years old, was proclaimed champion amid the cheers and handclapping of the other contestants and the spectators. Bill went through every game he played in the competition from One's through Capping's without missing once.

Rita Kennedy, only 10 years old, defeated the winners of all the other girls' group, thereby making herself champion over all the girls.

There was keen competition and good playing throughout the contest. The referees were Miss Adelaide Fortune, Misses Sheila and Effie Conroy, Mrs. Davis and Mr. Barton.

The winners of the boys were: First group (boys under eleven), Mike At-

kinson; second group (boys 11, 12 and 13), Dick English, with Will Ballard a close second; third group (boys 14 and 15), Gilbert Fowler; fourth group (boys 16 and over), Bill Davis, champion of the boys.

The winners of the girls were: First group, Rita Kennedy; second group, Helen Baird; third group, Margaret Sinnott. Champion of the girls, Rita Kennedy.

The question asked by a hundred children seemingly at least a hundred times each was, "What's next, Mr. Barton? What's coming next? Are they interested? Well, they are putting up a wonderful bluff if they are not. Is it worth while giving the boys and girls an interest in play, and an interest that is really theirs, and not an adult interest? You may answer that by another question. Is it worth while for adults to have interests? Look about you. The people that are really worth while are the ones who have some interest. It is the same with boys and girls.
