The Ambitious Alerts Liberal Tariff Platform.

We, the Liberal party of Canada, in convention assembled declare: That the customs tariff of the Dominion should be based, not as it now is, upon the protective principle, but upon the requirements of the public service.

That the existing tariff, founded upon an unsound principle and used as it has been by the Government as a corrupting agency, wherewith to keep themselves in office, has developed monopolies, trusts and combinations: It has decreased the value of farm and

other landed property;
It has oppressed the masses to the enrichment of the few; It has checked immigration; It has caused great loss of population; It has impeded commerce; It has discriminated against Great

Britain In these, and in many other ways, it has occasioned great public and private injury, all of which evils must continue to grow in intensity so long as the present tariff system remains in force.

That the highest interests of Canada demand a removal of this obstacle to our country's progress, by the adoption of a sound fiscal policy, which, while not doing injustice to any class, will promote do-mestic and foreign trade and hasten the re turn of prosperity to our people. That to that end, the tariff should be re-

duced to the needs of honest, economical and efficient government That it should be so adjusted as to make free, or to bear as lightly as possible upon the necessaries of life and should be so arranged as to promote freer trade with the whole world, more particularly Great Britain and the United States

We believe that the results of the proective system have grievously disappointed thousands of persons who honestly supported it, and that the country in the light of experience is now prepared to declare for a sound fiscal policy.

The issue between the two political

parties on this great question is now clearly defined. The Government themselves admit the failure of their fiscal policy, and now profess their willingness to make some

changes, but they say that such changes must be based only on the principle of protection. We denounce the principle of protection as radically unsound and unjust to the masses of the people, and we declare our conviction that any tariff changes based on

that principle must fail to afford any substantial relief from the burdens under which the country labors. This issue we unhesitatingly accept and upon it we await with the fullest condence the verdict of the electors of Canada.
