Oxford Radiators are cast from the best grade of iron in perfectly-made moulds. No diaphragms are used nor are there any complicated passages to retard the free circulation of the water or steam. There is no paper packing used in Oxford Radiators, and to this is greatly due their freedom from leaks.

The Oxford Push Nipple as used on Onford Radiators is the easiest to adjust or detach when it is necessary to add to or take off any of the loops. The Oxford Hot Water Boiler is made with a draw-out grate,

thus repairs may be made without disturbing the boiler. The fire-box of the Oxford Boiler is larger at the bottom, thus preventing the clogging of the grate with ashes.
