HER PHYSICIAN ADVISED**Taking Lydia E. Pinkham's Vegetable Compound**

Columbus, Ohio.—"I have taken Lydia E. Pinkham's Vegetable Compound during a change of life. My doctor told me it was good, and since taking it I feel so much better that I can do all my work again. I think Lydia E. Pinkham's Vegetable Compound a fine remedy for all women's troubles, and I never forget to tell my friends what it has done for me."—Mrs. E. HANSON, 304 East Long St., Columbus, Ohio.

Another Woman Helped.
Granville, Vt.—"I was passing through the Change of Life and suffered from nervousness and other annoying symptoms. Lydia E. Pinkham's Vegetable Compound restored my health and strength, and proved worth mountains of gold to me. For the sake of other suffering women I am willing to should publish my letter."—Mrs. CHARLES BARCLAY, R.F.D., Granville, Vt.

Women who are passing through this critical period or who are suffering from any of those distressing ills peculiar to their sex should not lose sight of the fact that for thirty years Lydia E. Pinkham's Vegetable Compound, which is made from roots and herbs, has been the standard remedy for female ills. In almost every community you will find women who have been restored to health by Lydia E. Pinkham's Vegetable Compound.

A SCHEME TO IMPROVE PARK

Proposition Made to Water Commissioners Regarding Amusements at Springbank.

HOLD OUT FOR MONEY

Commissioner Pocock Thinks London Should Get \$500 a Year at Least for the Privilege.

At a short session of the water commissioners yesterday afternoon a proposition was made by Mr. J. Givins and Mr. King, manager of the London street railway, to install amusements at Springbank Park.

Nothing was done, as the commissioners asked Mr. Givins to put his proposition in black and white, so that they would have something to deal with.

Mr. Givins, in opening the discussion, stated that his company were prepared to expend from \$10,000 to \$20,000 on amusement devices at the park, provided they were given an exclusive franchise for ten years.

Manager King, on behalf of the company, waived all rights the company had to the park in this regard.

City Wants \$500 a Year.

"Would you pay us \$500 a year for the privilege," asked Commissioner Pocock.

"We are running a considerable risk, so I do not think we can do that," answered Mr. Givins.

"The proposition does not appeal to me," answered Mr. Pocock. "I do not like the idea of tying up city property for ten years, particularly when no revenue is derived. It is altogether too one-sided. Why do you not buy property along the north side of Springbank, and place your devices there, and leave the city property free?"

"We have considered that," answered Mr. Givins. "It would not be fair for the city to enter into competition with us, when we had gone to all this expense. We are running considerable expense in placing \$20,000 worth of amusement devices at the park, without the danger of competition."

Laid Over.

On the suggestion of Commissioner Pocock the matter was laid over until the next regular meeting of the commissioners, when Mr. Givins will lay down a definite offer in black and white, showing what amusement devices he will erect, etc. The street railway company will also offer to forego the rights they possess to the park to the company of which Mr. Givins is part.

Those present were: Mr. A. T. McMahon, chairman; Commissioners Pocock, Wyatt, Darch, Mayor Beattie, Engineer Moore and Secretary Ellwood.

ARTISTIC PROGRAMME GIVEN

At a Concert Last Night in the Memorial Church.

An artistic programme was rendered at a concert given last night in the Memorial Church, under the auspices of the Anglican Young People's Association, as follows:

Address, Rev. John Morris; piano duet, Mrs. Charles Turner and Miss L. Armstrong; solo, Miss Edith Morris; Mr. Hugh Ward; solo, Miss Mabel Scarlett; reading, Miss Edna Smith; solo, Mr. Charles Clark; violin solo, Miss Florence Eggleston; solo, Mr. Hugh Ward; solo, Miss Mabel Scarlett; pianoforte, Miss Florence Eggleston; solo, Mr. Charles Clark; reading, Miss Edna Smith.

BROKE HIS LEG ROLLER SKATING

Charles Anderson, the Victim of a Peculiar Accident.

Charles Anderson, the 20-year-old son of James Anderson of 141 Wharncliffe road, broke his leg last night, while skating at the Simcoe street roller rink. Young Anderson had never been on roller skates and had gone to the rink last night to learn to skate. He got along gall right for a while, then something caused him to fall, and in doing so brought his right skate down on the other leg as he fell, snapping the large bone of the left leg between the ankle and the knee. He was removed to his home in a cab and Dr. Ferguson was called and reduced the fracture. It is expected, however, that he will be laid up for six weeks or more.

ANNIVERSARY CONCERT

Enjoyable Affair at Hyde Park Last Night.

A very enjoyable anniversary tea and concert was held in the Church of St. James' at Hyde Park last evening, the programme being provided by London talent.

Ald. Tancock occupied the chair. The quartette of St. James' Church, consisting of Misses Ella Deacon and S. Cullis, and Messrs Cal Hodgins and Charles Percy, rendered several numbers in a pleasing manner. Readings were given by Harry Ashby, Charles Evans and Miss Valerie Carrothers. A large crowd attended.

Mr. H. F. Day, of 867 Wellington street, has purchased the moving van business formerly conducted by Mr. S. J. Henderson.

Pianos to Rent

We will rent a nice piano for \$2 and up per month, and allow six months' rent on purchase. Heintzman & Co., 242 Dundas street.

Kodaks and Films

**"The Mollusc."**

Not since the time of Sarah Bernhardt's farewell American tour has there been a theatrical event of such importance.

The welcome received at the first performance of "The Mollusc" at the Empire, New York, on Monday, Jan. 17, was a positive ovation. The production of the play was interrupted on the occasion of both Sir Charles' entrance and Mary Moore's for a period of moments, while the audience, which completely filled Charles Frohman's ultra fashionable play-house, rose to its feet and showed its enthusiasm. Sir Charles has appeared in America on several occasions, and therefore is rather familiar with American audiences. His last tour, however, was before His Majesty King Edward, in recognition of his ability, bestowed upon him the honor of knighthood. There is only one other living actor to receive this honor. Sir Hubert Beerholm Tree, making in English history three players to receive the recognition of the crown, the third being Sir Henry Irving. Sir Charles Wyndham and Miss Mary Moore and their London company are the first to appear in "The Mollusc" next Saturday evening only. The plan opened this morning and a large crowd were on hand very early.

COAL PRODUCTION

REPORT OF UNITED STATES GEOLOGICAL SURVEY, SHOWING COURSE OF PRODUCTION OF COAL IN THE UNITED STATES FROM 1814, THE DATE OF THE EARLIEST RECORD, TO CLOSE OF 1907.

The sheet published by Mr. George Otis Smith, director of the United States Geological Survey of the Department of the Interior, while practically nothing on it but figures, illuminated in a most interesting way the course of coal production in the United States from the date of the first records. Of course, coal is mined in small quantities individually, forming a considerable aggregate, which is not reported at all to the department, but Mr. Smith's figures are large enough to stand on their own basis. Pennsylvania has a monopoly of the anthracite production, the output reported in 1880 having been in round figures 23,000,000 tons; in 1890, 45,000,000 tons; in 1900, 57,000,000 tons, and in 1907, 85,000,000 tons. Of the eight states producing over 10,000,000 tons of bituminous coal per year, Pennsylvania leads, with a production of 150,000,000 in 1907, having doubled the output since 1880. Illinois, the next largest, produced in 1907, 51,000,000 tons, having doubled since the year 1890. Next in production is West Virginia, with 48,000,000 tons in 1907, having doubled since 1901. West Virginia thus showing the largest rate of increase of any of the large producing states. Its output in 1880 was only slightly over one-quarter of the figure for 1907. In Ohio the production for 1907 was 32,000,000 tons, this state having doubled since 1880, the rate of increase, however, for the last few years having been much less than that of West Virginia. Consumption of coal by the enormous industries of Pittsburgh and the other river valleys of the state is on so tremendous a scale that it is estimated that while the output of mines in that district may show further increases for the next four or five years, it is likely that the amount will begin to decrease after that time. This condition, it is said, accounts for a growing feeling that well-bought coal mines in that belt will show steady appreciation in value, in addition to the operating profits.

The above information is particularly interesting, in view of the advertisement now being published in the papers of the offering of the portion that has not already been sold privately of 1,500,000, 6 per cent first mortgage sinking fund bonds of the Sterling Coal Company, a bus of 50 per cent in stock, by A. E. Ames & Co., Limited, and P. H. Deacon & Co., Toronto, and Rodolphe Forget and Johnston, McConnell & Allison, of Montreal. The offering is reported to have excited wide interest, and a very long list of subscribers is expected. The subscription books close on or before Tuesday afternoon next at 4 o'clock, the right being reserved to close them at any time.

THE GOOTMAN MURDER

New York, Feb. 1.—Spurred on by the mandate from headquarters that the murderer of Moses Gootman, the shirtwaist manufacturer, be caught, the police last night made two prisoners in connection with the crime and today landed another suspect.

Today's arrest was that of Thomas Valenti, a pearl buttonmaker. He is accused of burglary, but the detectives say his description tallies in many respects with that of the man wanted for the Gootman murder. The other prisoners are Harry Myers, alias the "Chicago Kid," and Morris Flegelheimer, both men with long records. Pawnshops all over the city were watched today and haunts of criminals scoured in the effort to round up those responsible for the "crime wave" of the past month which closed with a record of eighteen murders and robberies amounting to a quarter of a million dollars.

IMPORTANT RAILWAY ORDER

Stratford, Feb. 1.—An important rule went into effect on the middle division of the Grand Trunk on Thursday, Jan. 27, when circulars were issued from headquarters, instructing the engineers, conductors and yardmen to proceed at a rate not exceeding ten miles per hour through the following cities and towns:

Toronto, Brampton, Guelph, Berlin, Stratford, Hamilton, Brantford, Woodstock, London, Paris, St. Catharines, Niagara Falls, Buffalo, and also not to exceed that rate at numerous level crossings of highways throughout the country where traffic is especially heavy. This will affect all trains passing through Stratford, and will necessitate some little loss of time at the decreasing of speed. The order to slow down to the ten mile rate through towns and cities is not a new one. It has been out for some time, but the second part of the rule, relating to country crossings, is new. The level crossings are, perhaps, the cause of more railway fatalities than any other agency, and something had to be done. The trainmen will be obliged to make up the time lost between stations as far as possible, though this will be difficult as a ten miles per hour for a train is pretty slow.
