Clayton, and was suitably acknowledged by Sergt, Holloway.

have just returned to civilization. They went in by Revelstoke and cause out by Spokane Falls, having seen and heard enough to astonish them. They are well astisfied with the prospects of the district, and the building of Kaslo City upon a firm foundation will go forward witheast delay. The city is located on the shore of Kootenay Lake, at the mouth of the Kaslo; about ten miles above Ainsworth and ten miles, in another direction, from the Headryx smelter. The new place already boasts of a small, but connfortable, hotel, and a store is now in construction. The townsite, as level as prairie land, is being cleared of a scattered growth of hemlock, white pine and tamarack, and many lots have already been taken, whose owners intend to build on them at once. Provision has been made for the erection and operation of a saw mill, and 49 acres have been reserved for the surveys for an extension of the present short trail, on into the near future. Mr. John Keen, C.E., was dispatched to the scene of operations this morning to complete the surveys for an extension of the present short trail, on into the centre of the new camps, which will be the home of many hundred miners in the spring. A second hotel is under contract, and while keeping their expectations well within the bounds of reason, the Kaslo City people say that they believe the new town will have a population of \$,000 or 10,000 in a year or two. It's a big thing to think or say; but time will tell. The newly located claims, about which so Lacge Tax. Boots Blacks. An Italian caught a heaving line, Which was not thrown his way ; They termed it larceny in the charge ; He'll learn his fate to-day.

Nine locations were made in-all, four of them right along the lead. Several sacks of samples were secured and afterwards were tested at Nelson, the assays yielding 109 ounces and 120 ounces in silver respectively. The ore, but for its crude-like formation, might easily be taken for pure lead. The camp has been chris-tened the Chambers, after its finder. About two miles from this wonderful dis-covery, still another was made some few days before. What is now believed to be the same ledge as the Chambers, right south-east of it, being struck by Jack Ba-chanan and his partner, Jack Evans. They have made no end of locations, and shipped a lot of samples for assay. Not one yielded less than 100 ounces in silver, and one ran as high as 1,400, or 160 ounces higher than the best result obtained from the Bonanza King.

RHEUMATISM. It is not pleasant to be compelled to refer to the indisputable first that medical science has utterly failed to afford relief in rheumatic cases. We venture the assertion that although electricity has only been in use as a remedial agent for a few years, it is as cared more cases of Biacumaniam than alth officer means combined. Some of our leading physicians' recognizing this fact, are availing themselves of this mest potent of Nature's forces.

F RESTORE MANHOOD AND WOMANHOOD. As man has not yet discovered all of Nature's laws for righs-living, it follows that every one has committed more or les-errors which have left visible blemishes. To erase these evid dences of past errors, there is nothing to equal filectricity as applied by the Owen filectric Body Battery. Rest assured, any doctor who would try to accomplish this by any kind of drugs is practising a most dangerous form of charlatanism. **WE CHALLENGEE THEE WORLD** to show an Electric Belt where the current is under the con-trol of the patient as completely as this. We can use the same belt on an infant that we would on a giant by simply reducing the number of cells. Other belts have been in the market for five or ten years longer, but to d y there are more Owen Belts manufactured and sold than any other makers combined.

GTEMININGLES. Dr. Owen's Electric Incoles will pre heumacism and ourse Childains and Cramps in the reet s. PRICE, \$1.00 SENT BY MAIL.
