

FREE ADVICE TO SICK WOMEN

Thousands Have Been Helped By Common Sense Suggestions.

Women suffering from any form of female ills are invited to communicate promptly with the woman's private correspondence department of the Lydia E. Pinkham Medicine Co., Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence. A woman can freely talk of her private illness to a woman; thus has been established a confidential correspondence which has extended over many years and which has never been broken. Never have they published a testimonial or used a letter without the written consent of the writer, and never has the Company allowed these confidential letters to get out of their possession, as the hundreds of thousands of them in their files will attest.

Out of the vast volume of experience which they have to draw from, it is more than possible that they possess the very knowledge needed in your case. Nothing is asked in return except your good will, and their advice has helped thousands. Surely any woman, rich or poor, should be glad to take advantage of this generous offer of assistance. Address Lydia E. Pinkham Medicine Co., (confidential) Lynn, Mass.

Every woman ought to have Lydia E. Pinkham's 80-page Text Book. It is not a book for general distribution, as it is too expensive. It is free and only obtainable by mail. Write for it today.

NOTE AND COMMENT.

A 125 horse power gasoline engine, six cylinder, weighing only 400 lbs., has been perfected. It is of the two-cycle type. It looks as if steam in a few years will be an obsolete power.

The ordinary wire screen for doors and windows offer no protection from prying eyes. This can be remedied by giving the outside of all screens a coat of thin white paint. Strange as it may seem, the paint will not be noticeable, and while those inside may look out through the screens, outsiders cannot see into the room. The paint should be made as thin as possible with turpentine and applied with a broad, flat brush.

The New York State food investigating commission has carefully looked into the matter of cost, killing, shipping and selling some shipments of meat by the big packing houses. It found that 29 cattle sent from Omaha to New York yielded a profit of 10 cents per cwt.; 350 sheep and 50 spring lambs returned a net profit of 17 cents per cwt.; while 36 hogs

purchased in Kansas City netted 31 cents per cwt. A showing as good as that, however, could not be made in handling meats on a small scale.

There is a movement on foot in Ontario to allow the "West" to do its own "booming." Ontario is beginning to realize that she has been advertising a not overly-generous rival, and advising her own sons and daughters to go out and help the little fellow grow big. Well, he's growing big, now, and according to some writers, is manifesting a desire to "put the boots" to the old man who has fed him on milk and honey since the days of his infancy. Ontario has given of its best and plenty to feed the West, but the time has now come when she needs and can well requite every one of her own and many of her neighbors' children at the old home.

Happy is the boy who early in life chooses his profession or calling, and makes everything he does contribute to efficiency in it. One of the evils of our industrial system is that a boy can work for years without learning a trade. It is this fact that is causing our educationists to advocate technical schools, where our youths can be taught to be proficient in the mechanical art. Factories are willing to employ boys at boy's wages, but when these boys become men, they will want men's wages, and what probability is there of them receiving them unless they are able to do men's work with proficiency and dispatch?

Man has done wonders since he came before the public. He has navigated the ocean, he has penetrated the mysteries of the starry heavens, he has harnessed the lightning and made it pull street cars and light the great cities of the world. But he can't find a spool of red thread in his wife's work basket; he can't discover her pocket in a dress hanging in a closet; he can't hang out clothes and get them on the line the right side up. He can't hold clothes pins in his mouth while he is doing it either. He cannot be polite to someone he hates. He cannot sit in a rocking chair without banging the rockers into the baseboards. He cannot put the tidy on the sofa pillow right side out. He can't sew on a button. In short, he cannot do a hundred things that women do almost instinctively.

Children and Good Roads.

It is pleasing to learn from the officers of the Canadian Highway Association that the children throughout Canada are taking a keen interest in the essay competition on "What Good Roads Mean to Canada" and from all parts of the Dominion papers are being forwarded to the headquarters of the association at New Westminster, B.C.

As an encouragement to the children to busy themselves in the preparation of these essays, the president of the Canadian Highway Association, Mr. W. J. Kerr, is offering valuable gold, silver and silver gilt medals, and also a silver souvenir pin to all competitors whose paper attains a certain standard of merit.

While it should not be necessary for this incentive to interest the young people of Canada in good roads, and their relation to the well-being of the country, the fact remains that in this, as in other things, some inducement is often necessary in order to awaken the younger generation to the economic needs of this country.

Good Roads, as everyone will admit, are badly needed in Canada at the present time, but it is only when the people at large are ready to demand this—not merely to request it—that we can expect the authorities, whether local, municipal, provincial or federal, to act on this matter on anything like a large scale.

The aim and purpose of the Canadian Highway Association, as is well known, is to establish a Transcontinental road that will reach from Halifax, N.S. to Alberni, B.C., and while it is not the intention of this organization to do more than educate the public and act in an unofficial advisory capacity, it is yet doing much good work in this cause and will be largely instrumental in getting this highway, four thousand miles long, completed within five years.

We in this district must do our share of this work, and it behooves the Good Roads advocates of Lambton, to bestir themselves and lend all the assistance they can to the officers of the Canadian Highway Association in the good work they are doing for Canada.

License Act Amendments.

New License Act amendments introduced by Hon. Mr. Hanna provide: Prohibits establishment of storage for liquors in local option municipalities.

Gives Government power to prohibit sale of liquors in any prescribed area when such is deemed advisable.

Provides for imprisonment of anyone found drinking in local option districts who refuses to tell where the liquor was secured.

Prohibits licensee or employe from converting time cheque into money or taking same in part payment for liquor.

Nothing looks more ugly than to see a person whose hands are covered over with warts. They have these disfigurements on your person when a sure remover of all warts, corns, etc., can be found in Holloway's Corn Cure.

The post-mortem examination on the body of Charles Nahdee, the Walpole Island Indian, whose body was found on the shore of San Souci Island recently revealed that Nahdee's death was caused by gun shot wounds. There were shots through the lower part of the stomach, shattering the liver and also a shot in the leg.

DELICATE CHILDREN

Made Strong by Vinol

"I wish I could induce every mother who has a delicate, sickly child, to try your delicious cod liver iron tonic, Vinol."

"It restored our little daughter to health and strength after everything else had failed. It tastes so good she loved to take it—not a bit of cod liver oil taste.—Mrs. C. W. Stump, Canton, Ohio."

The reason Vinol is so successful in building up puny, delicate, ailing children, is because it is a combination of the two most world-famed tonics—the medicinal body-building elements of cod liver oil, aided by the blood-making and strength-creating properties of tonic iron.

If we can induce you to try a bottle of Vinol as a body-builder and strength-creator for your child, and you do not find it is all we claim, we will return your money on demand.

SOMETHING THAT SHOULD BE RUBBED IN.—Whenever pain is felt in the limbs or back, take Dr. Thomas' Electric Oil; pour a little in the hand, and applying it to the surface beneath which the pain lies, rub briskly. If the first application does not afford relief, which is not usual

ly the case, keep rubbing. The Oil will gradually penetrate to the affected part and relief will come.
It is amazing that anyone should have supposed that watertight compartments would be a safeguard in such a case as that of the Titanic. When 46,000 tons of metal are hurled against an iceberg of twenty miles an hour, nothing could prevent the destruction of the vessel. It is not improbable that a great number of passengers and seamen were instantly killed by the impact, as they would have been by a head-on collision of trains.
