

THE BRITANNY COW -- A correspondent of the N. Y. Tribune, writing from Philadelphia under date of Dec 4th, says: "An importation of a great agricultural wonder will be made here by one of our wealthy fancy farmers, in the spring. It is the Brittany cow, from France, a mere miniature creature, barely three feet high, docile as a cat, giving eight to ten quarts of rich milk daily, and consuming almost as little food as a goat. This breed has recently been introduced into England, where it has excited the utmost wonder and admiration even from experienced breeders. As described to me, every citizen who boasts a garden of moderate size will be able to be his own milkman by simply tethering a Brittany cow on his grass plot.
