Market Reports.

MONTREAL.

From Our Own Correspondent.

MONTHEAL, July 11, 1881.-The exports of lumber as reported at the Custom House from the 1st July to date were as follows: To Fleetwood, 12,926 deals and 1,477 deal ends; to Gloster, 10,940 deals; to London, 28,803 deals; to Cork, 16,290 deals; to Liverpool, 16,886 deals; to Dover, 7,000 pieces; to Montivideo, 51,076 pieces; and to Penarth Road, 11,140 pieces. All the wholesale trade in shipping lumber at this port is done in Ottawa and elsowhere, so that it is impossible to give the wholesale prices for shipping lots, there being now bought in the Montreal market for that purpose, business here being almost entirely confined to the supply of the building trade, which is pretty brisk at present and the demand is very good, which, from all appearances, will continue so for some time to come, and the market is in consequence

Stocks of building lumber are pretty full, but not beyond the expected requirements of trade. In cordwood there is not much doing just now, but the market is firm with upward tendency. A large contract has been taken here for maple at \$6.20 delivered, French measure, cord, which is six inches longer and three inches higher than that in use in Upper Canada.

July 25.—The shipments of lumber from the opening of navigation till the 18th inst. were as follows:—To Montevideo, 51,076 pieces and 685,-753 ft.; Buenos Ayres, 739,756 ft.; Penarth, 11,140 deals; Dover, 7,000 pieces; Liverpool, 16,886 deals; Cook, f. o., 16,290 deals; London, 28,805 deals and 210,000 ft.; Gloucester, 10,940 deals; Flectwood, 12,926 deals; Cardiff, 11,815 deals; Grenock, 6,148 deals; Glasgow, 830,580 ft.; Monunouth, 40,000 ft.; Mist Hartlepool, 45,-000 ft.; Queenstown, 10,000 ft.; Newcastle, 20,-000 ft.; St. John's, Nfld., 403,883 drum staves and 55,000 ft.; Lisbon, 8,147 deals and 734 deal ends; Antwerp, 55,000 ft.

The rates of freight have been steady, to River Plate \$15; to direct ports in Great Britain, 60s, to 62s, 6d.

The shipping trade has not been active during the past two weeks, only two cargoes having been shipped to the River Plate. The local demand has been good, and prices are well maintained, but without any change to note. Quotations unchanged.

LONDON, ONT.

From Our Own Correspondent,

This market continues so be active, with no indications of a slackening off in work. Very loud and long are the complaints of a deficiency in our accommodation, which the railroad companies would do well to remedy. The G. W. R. and G. T. R. are, of course, the chief lines coming into this city, but they alone are not to blame; the auxillery lines are equally in fault.

This city has in the neighborhood of a dozen large lumber yards, besides planing and sash mills, and the demands on both are unprecedented; for the surrounding country, in this county and the neighboring counties of Oxford, Lambton, Elgin and Huron are cettlets for the supply and production to an extent moreor less.

The codar block pavement which has just been completed in compliance with the terms of contract, gives entire satisfaction so far, and it is only a question of a very short time when it will be extended along Dundas street (one of our main thoroughfares) east of the city as far as Wellington street.

The Masonic Temple approaches completion, and it is without question one of the handsomest buildings west of Toronto. The Free Press of this city gave a representation of this magnificent structure in their issue a few weeks ago.

The calamity which befel this city on the 24th May last has resulted it, the total colapse of the Navigation Company, and the two steamboats, Porest City and Princess Louise were offered at auction the other day, but there were no bidders; and I do not see what anybody could do with them, unless they were made into ministure training ships for a juvenile navy. They are now nearly high and dry, and will soon have to be proped up on their keels, or where the keels should be; and as there is no outlet they must either sail the Thames or become sad momentos of a woeful day.

Hard wood fumber does not meet with much sale in this city, and what there is in the market has no set price.

Shingles continue to be very scarce, and an advance on my last figures will be found in accompaning list.

Oak plank and scantling sells here at from \$16 to \$22.

My report of this city's lumber market at this date is firm and brisk, and below I give quotations.

BOSTON.

The Journal of Commerce of the 23rd of July says:—There are no indications of a lull in the communities movement. The demand for dry stock is still without precedent at this season of the year. Argoes stay hardly long enough to be noticed, they are so quickly caught up. Hardwoods are scarce and firm, with the exception of ash, which latter is a little "eff" in price. Reports show the receipts of hardwoods to be light, and the anticipations of small future arrivals occasion a very firm feeling among holders. Advices from abroad show lumber to be very scarce, with high prices asked. The following are car load quotations.

THE REMENT that has had the most remarkable success in the cure of diarrhom, dyssentery, cholora morbus, and, indeed, every kind of summer complaint, brought on by eating improper food, such as raw regetables, unripe or sour fruits, lead milk, impure water, etc., the remedy that is the most pleasant, rapid, reliable, and effectual, is Dr. Fowler's Extract of Wild Strawberry. It is the finest remedy for all summer complaints known. For sale by all dealers.

NEW YORK.

The Real Estate Record of July 23, says: Very little in the way of positive complaint is to be heard on our wholesale market. Demand fluctuates a trifle, but sustains a good volume for the season, and there appears no apprehension of an, serious falling off. Indeed, the schedules already presented indicate that buyers are making early preparation for their fall and winter supplies, and as the call from other points a pears to be quite as fell as upon our own mer ket, it is not likely that the mill men will accumulate a stock upon which business must be forced. On the other hand, there is not at pres ent any disposition to express views of a special ly buoyant character, ruling prices standing metty full, and affording a fair margin to the producer and intermediate operator, while the consumer, having made calculations in accordance with the cost, can afford to submit gracefully. The export movement still promises well.

Eastern spruce retains a good healthy market, with no positive tendencies favorable to either buyer or seller. Now and then a cargo can be reached a triffe "off," while against this is an occasional sale at extreme valuation, but the bulk of the business will average about former cost. Advices from the mills represent much animation at present, and "hooks full of orders," as an insurance against any coming lull, but now and then a manufacturer can be found who will work in a schedule if the bid prove full. Prices range about as before, or say \$14@16 per M for randoms, and \$16@18 for specials, the latter for extra difficult.

White pine has gone out so freely this season on export orders as to leave scarcely any accumulation of shipping grades, and with the home consumption also free stocks generally are moderate. Moore goods are coming forward, but at a cost which must lead to firm holding, even if they do not find early sale, and the latter appears to be the strongest possibility. Accounts from the primary points are supporting. We quote \$17.00@19.00 per M for West India shipping boards; \$24.50@26.00 for South American do.; \$16.00@16.50 for box board; \$17.00@17.50 wide and sound do.

Yellow pine is well sustained in price, finds a good general demand, and the market throughout, according to the majority of reports, seems to be in a healthy, cheerful condition. Manufacturers are in some cases able to give rather better time on schedules, but all keep away, and do not find it necessary to shade cost to secure customers. For direct shipment from primary prints the demand has been better of late, but also quite particular over quality. We quote random eargoes at about \$24.00@25.00 per M; ordered eargoes, \$20.00@28.00 do. green flooring boards, \$24.50@26.50 do.; and dry do. do., \$27@29. Cargoes at the South, \$15@19 per M for uph, and \$20@24 for dressed.

Lardwoods of attractive quality continue in amall supply, and secure a good demand as soon as offered with full prices bid on all kinds. The offerings at interior points are small, and owners ideas extreme for anything in mercantile order. We quote at wholesale rates by carload about as follows: Walnut, \$77@35 per M; ash, \$35@38 do.; oak, \$40@45 do.; maple, \$30@35; chestnut, 1st and 2nd, \$30@35; do. do. culls, \$18@20 do.; cherry, \$50@55 do.; white wood, ½ and § inch, \$25@27.50, and do. inch, \$33@35 do.; hickory, \$35@45 do., for Western, and \$65@75 good nearby stock.

Shingles not unusually active, but selling well, and prices sustained without much difficulty. The supply is not very large or well assorted. We quote Cypress at about 86 for saps and 88.506.9 for hearts; pine shipping stocks, 84 for 18-inch, and Eastern saw grades at \$2.506.4.50 for 16-inch, as to quality and quantity. Machine dressed coder shingles quoted as follows: For 30-inch, \$166.22.27 for A and \$28.756.33.27 for No. 1; for 24-inch, \$6.506.16 for A and \$16.75 @23 for No. 1; for 20-inch, \$56.10.50 for A and \$11.256.11.75 for No. 1.

Latil,

The market has shown loss irregularity than last week, and presented few items of positive interest. Supplies were a little more plenty and occasionally quotations somewhat slow, but receivers appear to have placed all cargoes without shading cost, and the current quotation remains

at \$1.75 per M. A few arrivals may be expected every week, it is said, but nothing liberal or oppressive, and advices at hand indicate that quality will run good.

SAGINAW VALLEY.

JULY 27 .- The abundant activity in this market last week continues in increasing measure. It is a genuine surprise, the eagerness for lum. ber. The transactions, from their size and frequency, are really bewildering, when some of the dragging periods of the past year are recall. ed. It is considered a poor day when sales are not reported aggregating five or six million feet, Friday last the reports showed that over six and a half million feet changed hands. As for prices, they have covered a protty wide range on some grades. There was never more firm. ness felt, and it may really be said that prices have advanced, although some of the figures made in the transactions and the same as have appeared from time to time. The true state of the case will be revealed in the netice of sales below. The east, west and sout ave competed with each other in this market the past week, Chicago buyers being on the ground in numbers, picking up lots to suit their tra. .o, their requirements being largely bill stuff, although they have bought quite a quantity of boards and strips. Ohio, New York and Pennsylvania dealers have also placed orders here.

The advance of lumber at Chicago of course strengthens this market, and under the extraordinary demand prices on the river may be expected to advance. The following sales have been reported the past week:-I,100,000 feet common stock at \$6.50, \$13 and \$32; 300,000 feet at \$7, \$14 and \$32; 1,200,000 feet at \$8, \$16 and \$36; 500,000 feet at \$7, \$14 and \$35; 300,000 feet at \$7, \$14 and \$32; 1,200,000 feet at \$3, \$16 and \$35; 1,000,000 feet at \$7.50, \$15 and \$35: 700,000 feet at \$7, \$14, and \$33; 1, 000,000 feet at \$7.50, \$15 and \$35; 125,000 feet at 87.50, \$15 and \$35; 200,000 feet at \$8, \$16 and \$36;600,000 feet at \$7, \$14 and \$35; 1,000,-000 feet at \$7.25, \$14.50 and \$35; 9,000,000 feet #4, \$7, \$14, \$32, \$7.50, \$15 and \$35; 350,000 feet, prices not learned; 175,000 feet Norway bill stuff at \$9; 1,600,000 feet Norway bill stuff at \$3 and \$10; 350,000 feet prices not learned; 3,000,000 feet at \$7, \$14 and \$32; 2,800,000 feet, price not reported; 2,600,000 feet, price not reported; 450,000 feet, price not reported; 1,250,-000 feet, price not reported; 500,000 feet at 87, \$14 and \$32; 1,000,000 feet at \$7.50, \$15 and \$35; a choice lot, amount not learned, at \$3, \$16 and \$40; 975,000 feet Norway bill stuff at \$3@10; 2,000,000 feet pine lumber at \$6.75, \$13.50 and \$2; 1,500,000 feet at \$7, \$14, \$7.50, \$14.50, \$32 and \$35; 200,000 feet at \$7, \$14 and \$35; 300,000 feet at \$7, \$14 and \$33; 300,000 feet at \$9, \$17 and \$36; 510,000 feet at \$7, 814 and \$33; 1,000,000 feet at current rates: 425,-000 feet at \$7.50, \$15 and \$35.

Freights remain the same as quoted last week, namely: Bay City to Buffalo and Tonawands, \$2.25 per M; Saginaw to same ports, \$2.50; Bay City to Ohio ports, \$1.75; Saginaw to Ohioports, \$2; Bay City to Chicago, \$2.50; Saginaw to Chicago, \$2.75.

The amount shipped the past week has increased over the previous week, but the season's shipments have not yet overtaken in quantity those of last year at the same date, and if they are going to this season it is time some sign of it appeared. The amount of clearances of lumber to July 23, last year were over 375,000,000 feet; to the same date this year the aggregate is

Staros 44,000
Cedar posts 2,500
Of those amounts there was cleared from East
Saginaw 10,300,000 feet of lumber and 3,350,660

ahingles, the balance clearing "rom Bay City.

The total shipments of lumber, shingles and lath from the river for the season to date were as follows:

Shingles are in good demand and prices firm,
