## London Gasoline Engines

## Simple, Safe, Powerful

FTER careful examination of a number of makes we decided that the London engine on account of its simple construction was particularly well suited to the farmers' needs.

These engines are built in sizes ranging from 1½ to 12 H. P., and can be easily fitted up to supply power for all light farm machines. The upright engine shown requires only a very light foundation and can be moved about to run the churn, washing machine or separator, cut or pulp roots and perform numerous other tasks.

No danger. No trouble to operate. Every part is simple. It requires little or no adjusting. Got one for your farm, and a force pump with jack—it will protect you from fire.

We want you to write us to-day. We will show you how you can STOP HARD CHORES with this London Gasoline Engine. Write for Engine Catalogue.
