

The Metamorphosis Of the Girl Into Womanhood

The frequent occurrence of menstrual disorders in young girls during puberty, where no organic lesions exist, strongly indicates the need of a tonic at such times.

At this age there is a gradual loss of interest, recurrent headache, vertigo, palpitation of the heart, loss of appetite, indigestion, and a general weakness that speaks of impoverished blood. The structural and functional changes taking place throughout the body have left their trace upon the quality of the blood.

Pepto-Mangan (Gude)

is indicated in such conditions because it is readily assimilated by the weakest stomach and needs no preparation to become immediately absorbed by the blood. Therefore there is no added strain placed upon the functions of digestion, assimilation or excretion.

Where a nutrient tonic is required at the age of puberty, PEPTO-MANGAN (GUDE) produces the most beneficial results.

To assure the proper filling of prescriptions, order in original bottles.

Samples and literature sent free of cost upon request.

BACTERIOLOGICAL WALL CHART FOR THE PHYSICIAN'S OFFICE.—One of our scientific and artistically produced, bacteriological charts in colors exhibiting 60 different pathogenic micro-organisms will be mailed free to any regular medical practitioner upon request, mentioning this journal. This chart has received the highest praise from leading bacteriologists and pathologists in this and other countries, not only for its scientific accuracy, but for the artistic and skillful manner in which it has been executed. It exhibits more illustrations of the different micro-organisms than can be found in any one text-book published.
