by A. L. Benedict, A.M., M.D.; "Treatment of the Night Sweats of Phthisis by the Administration of Sodium Telluriate," by Ernest Barrie, M.D.; "The Inadequacy of the Physical Signs as Indicating the Gravity of Pneumonia," by A. H. Smith, M.D.; "Atypical Typhoid Fever," by J. C. Wilson, M.D.; "The Modern Operations for the Radical Cure of Inguinal Hernia," by Edmund Andrews, M.D., LL.D.

In Volume III. there is a symposium on "Genito-Urinary Diseases," consisting of seven lectures by different teachers. Fr. Rubenstein has a lecture on "A Contribution to the Pathology and Treatment of Epilepsy"; Willy Meyer, M.D., one on "Gastrostomy by Kader's Method Cholecystetomy"; Chauncy D. Palmer, M.D., one on "Reciprocal Relations of Gynecological and Neurological Diseases; Thompson S. Westcott, M.D., a monograph on

"The Scientific Modification of Milk."

Volume IV. has also a continued symposium on "Genito-Urinary Diseases," and several important contributions, notably, "Mosquitoes and the Prophylaxis of Malaria," by Prof. B. Grassi; "Recent Advances in Diagnosis," by James J. Walsh, Ph.D., M.D.; "The Rôle of the Blastomycetes, or Ferments in the Etiology of

·Cancer," by Prof. Demetrius Roncadi.

Many of the articles are illustrated with coloured plates, woodcuts, etc. In the perusal of these lectures one gets the subjects treated of, containing the most recent advances, and given in an attractive style. Only writers of known ability are asked to contribute; hence one expects to and does get in the four quarterly volumes a comprehensive review of the latest phases of medical progress.

J. B. McC.

PUBLISHERS DEPARTMENT.

LITERARY NOTE:

American readers will be glad to know that the important Quarterly Review article on "The Character of the Queen" will be reprinted entire in THE LIVING AGE for May 25 and June 1. No article regarding the Queen has made such a stir in England as this, and no other is written from so close and intimate knowledge. The London correspondent of The New York Tribune, cables that there is almost as much speculation as to its author as there has been regarding "An Englishwoman's Love Letters." The two numbers of THE LIVING AGE containing the article will be mailed postpaid for twenty-five cents.

THE "PAPYROS EBERS."

Believing that physicians, of all men, are most interested in the history of their art, the makers of Hemaboloids are now prepared to present to their friends in the medical profession a fac-simile reproduction of the beginning of the earliest medical treatise extant, together with transcription into hierogly-

phics and translation of a portion of the text.

The famous "Papyros Ebers," which was written during the reign of the Egyptian king Bicheres, 3,500 years ago, was discovered by the celebrated archeologist, Georg Ebers in 1872, when an Arab brought him a metallic case containing a papyros roll enveloped in mummy cloths, which he claimed had been discovered between the bones of a mummy in a tomb of the Theban Necropolis. A complete description of the papyros and its history is inclused in the reproduction, and is certainly extremely interesting to physicians and antiquarians generally. A copy will be forwarded by The Palisade Manufacturing Co., Yonkers, N.Y., to any physician who may have failed to receive one.
