

Canada's reputation as a leader in virtually all types of painting and finishing equipment. To paraphrase the slogan of a major paint and paint equipment manufacturer, Canadian products and systems "cover the field."

Large international auto-makers requiring a complete state-of-the-art paint system for a new car assembly plant find the world's best in Canada. Over the last five years Canadian companies have won about \$1 billion in contracts to design, fabricate and install these systems for major automakers.

The body shop owner looking for a custom-designed paint spray booth and even will also find excellent value for money in Canada. In the U.S. especially with recent savings on the rate of exchange, a top-quality American abrasive blast cleaning system can be purchased.

Canadian suppliers are not confined to the automotive sector. Some have carved out a "niche" in specialty products such as paint shapers, road line painters, paint colorant dispensers and spray-gun accessories.
