In the course of our market studies on the progressive Tokyo Round reductions in U.S. tariffs, some items were also found to be included in the U.S. tariff nomenclature harmonization exercise which may affect adversely Canadian interests. Copies of our report covering tariff Schedules II to VII, have been given to Ray Rush to ascertain exactly the changes that will occur through harmonization.

2. I have asked Mr. Nana Tandoh, who is doing this research work for us, to assist Ray as required.
