

Current Export Markets

U.S.A.

Company Summary

Spinex Medical Technologies Inc. was established in 1987 as the marketing and distribution arm of Diagnospine Research, a company committed to spinal research. Spinex has an exclusive license to market worldwide technology developed by Diagnospine including a non-invasive method for spinal evaluation, called the Spinoscope. This machine uses sophisticated computer and electronic technology to measure the kinematics and muscular activity of the spine and automatically stores all information in a computer. Since its introduction in 1988, Spinex Medical has made rapid inroads into the United States and European markets. The two companies maintain an extensive R and D program, focusing on developing a new generation of non-invasive tools.

Company Summary

Founded in 1975, Starplex Scientific is engaged in the manufacture and marketing of single-use medical devices, primarily plastic components for the health care market. The company's 3,600-square-metre (40,000-square-foot) manufacturing plant has full moulding capabilities, an in-house quality control laboratory and fully-automated media handling facilities. Starplex's laboratory disposables, marketed under the trade names of Starswab, Leakbuster and Dip Slides, are distributed extensively throughout North America. The company is committed to ongoing research and development to extend product usage.

Starplex's Dip N Count is a fast, reliable screen test used for the detection of bacteria in urine, resulting in rapid diagnosis.
