Mr. Thomas L. Morton, of Gladstone, Manitoba, writes:—"My land is all brush, which I consider the best in the end, but more labor. I have twenty acres dark loam, sown with Timothy, red top and clover; 25 head of stock, and 50 acres of crop, which pays far better than 100 acres of crop. Pigs pay well. Native hops grow well."

Mr. ROBERT CAMPBELL, Bridge Creek, P. O., Manitoba, writes:—"My opinion is that any man with, say, from 500 to 1,000 dollars (£100 to £200) and energy to go to work, will have no difficulty in making a comfortable home for himself and family."

Mr. John T. Cox, Box 44, Rapid City, Manitoba, writes:—"As an agricultural country it is a splendid one—that is the crops must be put in early, and then they will do all right."

Mr. Duncan Modonell, Baie St. Paul, Manitoba, writes:—"The Canadian North-West, if once settled, will be and is the best agricultural country of all I have travelled

through."

Mr. Joshua Elliott, of Sourisburg, Man., says:— I consider this country the best in the world for all classes of farmers. For the capitalize, plenty of room and safe returns; and the man of limited capital, to secure a good home and be independent. I have given you a true statement of my own experience. You have my address above, and persons wanting information by sending a stamped envelope I will answer it, and give them the benefit of all my experience."

Mr. Samuel Day, Sec. 34, T. 13, R. 30, Fleming, N.W.T.—"I should like to see the emigration agents go more into the farming districts of England, and induce more farm laborers to come to this country. I would suggest Devoushire, as labor is plentiful there and wages low. I am afraid some of those city people will not make good settlers, and hence have a bad effect by writing home bad accounts. I am satisfied this is one of

the best countries for an industrious man with energy."

BOLTON, FERRIS, of Calf Mountain, Manitoba, says:—"I firmly believe that this country has advantages over all others for growing grain and raising stock, and would advise all young men who have not made a start, and all tenant farmers with limited capital to come here."

Testimony such as is contained in the foregoing pages could be produced indefinitely. The bountiful resources of our Great North-West as herein to a small extent shown, cannot fail to impress the reader with the knowledge that we have indeed a country whose resources and attractions are boundless.
