Board of Control Complete Revision of the Estimates, But Tax Rate is Not Definitely Settled - Controllers Optimistic-Only Statutory Increases for Civic Employes.

No announcement was made yester-day as to the tax rate for the year, altho the work on the revision of the altho the work on the revision of the estimates was practically completed ardson, B.A., at the closing meeting of the board of control at their private the public school department of the Onthe board of control at their private meeting yesterday afternoon. From the remarks of the controllers, however, it was understood that the rate would be about the same as last year—18 mills. Mayor Geary declined to express any opinion except that the announcement would likely be made to-day. The original estimates, he said-provided for a 20-mill rate, and hence considerable pruning was necessary. Controller Church stated that the revised board of education's estimates, would require 6 2-10 mills, which was the same rate as they received last year. The ravision of the estimates is now completed, but some clerical is now completed, but some clerical work is required to put them in presentable form.

Salary Increases The work of the board of control in revising the estimates to lower the tax rate was further facilitated yesterday morning when the board passed Controller Foster's motion providing that the civic employes should receive only the statutory increases of salary this year. Controller Foster's first motion to the effect that no further increases of salary be granted this year, was defeated.

Water Rates.

Water rates may be paid at 120 different branch banks this year, and the city treasurer expects that fully 50 per cent of these taxes will be received in this way. The purpose is to relieve the congestion at the office in the city hall. On Monday 80,000 water bills will be sent out.

At their meeting yesterday morning, the board of control decided to recommend that \$5000 be spent to test Ald. Yeomans' scheme of sinking a well at the island as a means of obtaining the city's water. The decision was reached after a letter of A. C. Ames was discussed, which stated that all the necessary tests could be made and a report submitted at a cost of not more than \$5000.

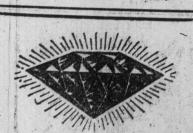

more than \$5000.

Some discussion followed as to whether Mr. James should be asked to undertake the experimental work. Controller Hocken believed he should be allowed to make the tests, but Mayor Geary said he had a man in view in London, who had experience with such work, and who would be able to give the city expert advice as to the feasibility of the scheme. It was agreed to send the matter on to council with the recommendation that immediate action be taken.

Girls' Friendly Society.

A CHANCE TO VISIT BUFFALO Pacific Railway.

On account of the Y. M. C. A. excursion to Buffalo (last of the season), return thekets will be issued via C. P. R., at the low rate of \$2.70; good going via 1.15 p.m. train; return limit Monday April 15

W. L. Richardson Advocated Industrial Classes in City Schools on Parl With Entrance Examination at Ontario Educational Association Conference Yesterday.

vor of manual training; the only ilscussion that now took place was in the manual training camp itself, and was on matters of detail.

Bducation, up till comparatively resent times, he said, had taken place in the home; now our educational system had taken it almost entirely out of the home. It had been made universal and compulsory, the principle of compulsory education being carried in some parts of the United States up till the age of 18 years. There was a strong tendency to uniformity, the our boys and girls differed widely from each other.

other.

The world's work he divided into business, agriculture and construction. These three branches engaged 75 to 80 per cent. of our people. In the cities agriculture was, of course, eliminated, and there the C. M. A. had estimated that three-fourths of all the boys and girls wene into construction, in the various departments of factory, shop or building work. In Toronto 77 per cent. left school before they had passed the entrance examination.

Vocational Education, he continued.

dallowed to make the tests, but Mayor Geary said he had a man in view in London, who had experience with such work, and who would be able to give the city expert advice as to the feasibility of the scheme. It was agreed to send the matter on to council with the recommendation that immediate action be taken.

Giris' Friendly Society.

A deputation from the Giris' Friendand asked for a special building at the exhibition, which they proposed to use for dining hall purposes to raise funds for their organization. The application was not supported by Dr. Orr. however, and the board declined to make the recommendation.

Civic Play Grounds.

Representatives' from the Playsgrounds Association waited upon the board of control privately yesterday in order to discuss some plan whereby there might be some co-ordination regarding the playspunds of the city and those under the jurisdiction of the sassociation. It was finally agreed to leave the matter in the hands of Park Commissioner Chambers, who will substitute the matter in the hands of Park Commissioner Chambers, who will substitute the matter in the hands of Park Commissioner Chambers, who will substitute the matter in the hands of Park Commissioner Chambers, who will substitute the matter in the hands of Park Commissioner Chambers, who will substitute the matter in the hands of Park Commissioner Chambers, who will substitute the matter in the hands of Park Commissioner Chambers, who will substitute the matter in the hands of Park Commissioner Chambers, who will substitute the matter in the hands of Park Commissioner Chambers, who will substitute the matter in the hands of Park Commissioner Chambers, who will substitute the matter in the hands of Park Commissioner Chambers, who will substitute the matter in the hands of Park Commissioner Chambers, who will substitute the matter in the hands of Park Commissioner Chambers, who will substitute the matter in the hands of Park Commissioner Chambers, who will substitute the matter in the hands of Park Commissioner Chambers, w

thing on the menu at the table dhote. There should not be a rigid course of study for everythony of everything, but our system should be made to serve in dividual needs.

Mr. Richardson advocated an elementary industrial class in city echools parallel to the entrance class, in which as much as five half-hours a week should be given to shop work, the rest of the course being made as cultural as possible, but with a definite bearing on the menu at the table dhote. Hon, president, Prof. Dupuls; president, I, the control of the course should be a rigid course, of study for everythony of everything, but with a definite bearing on the menu at the table dhote.
