# For Forty Years We Have Been Allies

Do you remember what farming was like in Canada forty years ago? We remember very well what manufacturing was like, what there was of it. The farmers were struggling on farms and getting low prices for their produce. The few manufacturers were also struggling, for the most part unsuccessfully. For forty years we have worked together. Have we not both prospered? We buy from you most of what you grow. You buy from us most of what we make. That has been and is the basis of our alliance.

The manufacturing establishments in Canada employ nearly 700,000 people. Their wage-roll is about \$700,000,000 a year. Moreover, they buy annually nearly \$2,000,000,000 worth of raw material, mostly in Canada. Around these factories are congregated a hundred other forms of business. All these are your customers, and statistics show that this home market is four times as valuable to you as your entire foreign market. Decrease its buying powers, and your sales lessen and your prices drop.

## How A Minority Seek to Sever Our Alliance

The Prairie Grain Growers are urging the Government to throw down the tariff wall between Canada and the United States because they want to save a little money (mainly on freight rates) by buying from the United States manufacturers just south of them. They, who constitute about 20 per cent. of the agricultural population of Canada, ask all the other farmers, who constitute the remaining 80 per cent., to change the policy which they have supported for forty years.

Furthermore, to raise the Dominion Government revenue, they would substitute for the tariff, which collected last year about 60 per cent. of that revenue, an increase of income taxes, inheritance taxes, corporation taxes and taxes on unimproved land values. As it is quite obvious that such taxes would affect the farmer but little, this is the inducement they are using to get you to forsake us and follow the free trade prophets no one knows where.

We think this appeal will fail. First, because it seems to be founded on the assumption that the farmers of Canada want to slip out of paying any increased taxes that may be needed for soldiers' pensions, gratuities and re-establishment. We have found in all our experience that the farmers of Canada are not this class of men. Second, because the argument is unsound. It requires little reflection to see that if our market is thrown open and flooded, many of our manufacturers, caught in the struggle to re-adjust themselves from war to peace conditions, will not be able to keep going. Would this not result in many of our people, unless they were able and willing to take up farming, leaving for the United States? Would not the rest of the population then, which might consist chiefly of farmers, have to pay all the taxes?

The Grain Growers do not represent the entire population of the Prairie Provinces. They do not represent the business population; they do not by any means represent all the farmers. The Prairie Grain Growers' Associations are dominated by a group of free traders whose one idea seems to be to get free trade all over the world. Unfortunately for their theories, just at the present time all the rest of the world seems desirous of getting protec-

# Tariff Policy of Other Nations

GREAT BRITAIN is shutting out the goods of other countries (except the Dominions). FRANCE and ITALY are shutting out the goods of other countries by import

THE DEMOCRATIC PARTY in the United States, which advocates low tariffs, seems to be going out of power, and the Republicans, who always support high tariffs, have now a majority in both Senate and Congress. Do you think that this means that the United States' tariff is going up or down?

SOUTH AFRICA is increasing its tariff. Australia. New Zealand, Newfoundland, Japan, Brazil and Portugal are all jealously maintaining their tariffs.

Why is this wave of protection sweeping over the world? In a word, because the various countries are trying to produce all they need at home, in order to provide work for their own people-many of them returned

Why then is this Western minority of the farmers of Canada determined to go in the exactly opposite direction?

In opposing the demands of the Grain Growers, we do not in any sense intend, as they sometimes say, to show hostility to them. They are our customers. Is not our prosperity affected by theirs? Beyond all this, if the farmers do not prosper, neither we nor the country can prosper. Agriculture and industry are the basis of the country's strength. But we feel that these demands of the Grain Growers aim a deadly blow, not only at industry but at the whole

What justifies the Grain Growers in demanding that their personal grievances be cured at the expense of the rest of the country? Are they in a desperate position? Have they been losing heavily? Are they suffering from too much adversity or too much success? Are they in any danger comparable to the one great danger in Canada now?-

### THE DANGER OF UNEMPLOYMENT

the danger which may place thousands in need of shelter, food and clothing?

Most Canadians feel strongly that until this danger is avoided, and the country safely restored to a peace basis, the nation should not be disturbed by any tariff controversy at all.

When this danger is passed, and the country knows where is stands, and what other countries of the world are going to do, then the tariff question should be taken up and such a tariff should be framed as will suit, not the manufacturers merely, nor the farmers merely, but the country as a whole, and by adding to the prosperity of the nation, add to the prosperity of each and every class—the only safe path to prosperity for any country or any class in that country.
